I Think the Media Has To Become More Sophisticated to To Understand You Know What It Means To Have Scientific Results That Are Well Accepted versus Scientific Hypotheses or Scientific Results That Have Yet To Be Replicated for Example and There's of Course a Big Difference between those Things and Often that's that's Lost from the Media How Long How Many Times You've Been in Space and What's the Longest Time You've Been Up in Space I Was Up in Space Twice both on Space Shuttle Flights the First Flight Was Seven Days the Second Flight Was Nine Days

How Long How Many Times You've Been in Space and What's the Longest Time You've Been Up in Space I Was Up in Space Twice both on Space Shuttle Flights the First Flight Was Seven Days the Second Flight Was Nine Days and I Was Actually in Training for My Third Flight at the Time of the Challenger Accident and at that Time Right after that Accident the Shuttle Was Grounded for about About Three Years a Little over Three Years I Think Yeah if You Could Go Up in Space Again Would You and like What Classes Did You Have To Take I in College To Be Able To Get There

I Actually Don't Think that that the Solution Is in a Space Program I Think that There Are Candidates Out There To Kind Of Galvanize the Interest of the the Country but Just from the the Programs That We've Done with with Students You Know Middle School Students Elementary School Students if I Had To Pick an Area That Actually Could Start Driving an Interest in Science Education I Think It Is Actually Environmental Science Climate Change because There's a Huge Interest in that among and the Kids and that that's an Enormous Challenge
