Before elevating the house, the porches are braced to keep them attached to the house during the raising process.

Many trenches were hand dug so that the steel beams could be installed under the house, since the house did not have a crawl space.

A hydraulic lift system was used to elevate the house.

The home is up and braced with blocking. The utilities are reconnected. Power was never lost during the elevation process.

Pre-elevation mark that the bottom of the floor joist must be elevated to

The concrete block wall is being built per the engineering design.

Home placed on new foundation, porches and carport reconnected, and new stairs built.

The Shocking Truth About Flood Zone AE That Saved My Client \$4,200 in 2025 - The Shocking Truth About Flood Zone AE That Saved My Client \$4,200 in 2025 3 minutes, 30 seconds - Most homeowners panic when they discover they're, in **Flood**, Zone AE, but this insider information saved my client \$4200 annually ...
