

# Retrotopia

## Retrotopia

We have long since lost our faith in the idea that human beings could achieve human happiness in some future ideal state—a state that Thomas More, writing five centuries ago, tied to a topos, a fixed place, a land, an island, a sovereign state under a wise and benevolent ruler. But while we have lost our faith in utopias of all hues, the human aspiration that made this vision so compelling has not died. Instead it is re-emerging today as a vision focused not on the future but on the past, not on a future-to-be-created but on an abandoned and undead past that we could call retrotopia. The emergence of retrotopia is interwoven with the deepening gulf between power and politics that is a defining feature of our contemporary liquid-modern world—the gulf between the ability to get things done and the capability of deciding what things need to be done, a capability once vested with the territorially sovereign state. This deepening gulf has rendered nation-states unable to deliver on their promises, giving rise to a widespread disenchantment with the idea that the future will improve the human condition and a mistrust in the ability of nation-states to make this happen. True to the utopian spirit, retrotopia derives its stimulus from the urge to rectify the failings of the present human condition—though now by resurrecting the failed and forgotten potentials of the past. Imagined aspects of the past, genuine or putative, serve as the main landmarks today in drawing the road-map to a better world. Having lost all faith in the idea of building an alternative society of the future, many turn instead to the grand ideas of the past, buried but not yet dead. Such is retrotopia, the contours of which are examined by Zygmunt Bauman in this sharp dissection of our contemporary romance with the past.

## Retrotopia

A journey forward into the past... The year is 2065. Decades ago, the United States of America fell apart after four brutal years of civil war, and the fragments coalesced into new nations divided by economic and political rivalries. Most of the post-US America is wracked by poverty and civil strife, with high-tech skyscrapers rising above crowded, starving slums. But one of the new nations, the Lakeland Republic of the upper Midwest, has gone its own way, isolated from the rest by closed frontiers and trade embargoes. Now Peter Carr, an emissary from the newly elected administration in the Atlantic Republic, boards a train to cross the recently reopened border into Lakeland territory, on a mission that could decide the fate of his nation. Ahead of him lies a cascade of experiences that will challenge his most basic assumptions about economics, politics, and the direction history is moving. Alone among the post-United States republics of North America, the Lakeland Republic has achieved prosperity and internal peace, and it's done so by modelling its future on the past...

## Nostalgia Now

This volume explores the nature of nostalgia as an important emotion in contemporary society and social theory. Situated between the 'sociology of emotions' and 'nostalgia studies', it considers the reasons for which nostalgia appears to be becoming an increasingly significant and debated emotion in late-modern culture. With chapters offering studies of nostalgia at micro-, meso- and macro-levels of society, it offers insights into the rise to prominence of nostalgia and the attendant consequences. Thematically organised and examining the role of nostalgia on an individual level – in the lives of concrete individuals – as well as analysing its function on a more historical social level as a collective and culturally shared emotion, Nostalgia Now brings together the latest empirical and theoretical work on an important contemporary emotion and proposes new agendas for research. As such, it will appeal to scholars of sociology, social theory, psychology and cultural studies with interests in the emotions.

## **Dystopian Emotions**

As nations reel from the effects of poverty, inequality, climate change and the aftermath of the COVID-19 pandemic, it feels as though the world has entered a period characterized by pessimism, cynicism and anxiety. This edited collection challenges individualized understandings of emotion, revealing how they relate to cultural, economic and political realities in difficult times. Combining numerous empirical studies and theoretical developments from around the world, the diverse contributors explore how dystopian visions of the future influence, and are influenced by, the emotions of an anxious and precarious present. This is an original investigation into the changing landscape of emotion in dark and uncertain times.

## **Invisible Seasides**

Invisible Seasides positions the seaside as a lens for understanding lived utopia, pinned in a certain place, an immovable feature in a landscape where our hopes and fears continue to unfold. Wide-ranging in theme, it brings a double perspective, past and present, to bear on how we understand contemporary seaside experience. Presenting a magical paradox of the modern seaside, this book traces the development of a cultural phenomenon from the mid-1800s to the present day. In the process, it modifies the accepted narrative about its rise and fall, reappraising our understanding of the end of a Mass Utopia, and shining new light on the diversity of post-utopias that have emerged in its afterlife. Fusing social theory, social history, and leisure studies, its thesis adroitly envisions the diverse density of the seaside through a critical lens, making the unfamiliar familiar and vice versa, providing us with an exemplar for a different way of thinking sociologically, which will be used by scholars from a range of different subject fields to encourage fresh reflection on social continuity and change.

## **Retrotopia**

**FORWARD TO THE PAST** The year is 2065. Decades ago, the United States of America fell apart after four brutal years of civil war, and the fragments coalesced into new nations divided by economic and political rivalries. Most of the post-US America is wracked by poverty and civil strife, with high-tech skyscrapers rising above crowded, starving slums--but one of the new nations, the Lakeland Republic of the upper Midwest, has gone its own way, isolated from the rest by closed frontiers and trade embargoes. Now Peter Carr, an emissary from the newly elected administration in the Atlantic Republic, boards a train to cross the recently reopened border into Lakeland territory on a mission that could decide the fate of his nation. Ahead of him lies a cascade of experiences that will challenge his most basic assumptions about economics, politics, and the direction history is moving. Alone among the post-USA republics of North America, the Lakeland Republic has achieved prosperity and internal peace, and it's done so by modeling its future.....on the past.

## **The 'Second World' in Contemporary British Writing**

The thirteen contributions to this collection all explore or exemplify the ongoing British interest in the socialist world before 1990. In autobiography, fiction, film, history, and lexicography, these chapters show how contemporary Britain is engaging with the past project to build socialism in Europe, and what this means for the present and the future of our continent. Contributions come from a wide range of disciplinary and geographical backgrounds, and the volume is further enriched by a short story especially written for this book and by an in-depth interview with the author of a recent popular history of the GDR. Together, these chapters offer a unique perspective into contemporary British writing on the 'second world' and the enduring fascination with the failures of futures past.

## **The Routledge Handbook of Nostalgia**

The Routledge Handbook of Nostalgia serves as a guide to the complex and often contradictory concept of

nostalgia, as well as the field of “nostalgia studies” more broadly. Nostalgia is an area of intense interest across several disciplines as well as within society and culture more generally. This handbook brings together an international, interdisciplinary team of researchers to survey the current landscape and identify common trends, achievements, and gaps in existing literature. Comprising 45 chapters, the volume covers the following topics: Disciplinary perspectives of nostalgias including philosophy, history, literature, and psychology. Conceptual aspects of nostalgia including homesickness, temporality, affectivity, and memory. Historical and political dimensions such as afro-nostalgia, populism, feminism, and queer nostalgia. Spatial and material aspects of nostalgia including ruins, regionalism, and objects. Media-related nostalgia such as analogue and digital nostalgia, reboots, revivals, gaming, and graphic novels. Essential reading for students and researchers working in nostalgia studies, this book will also be beneficial to related disciplines such as philosophy, anthropology, geography, history, and literature; cultural, media, heritage, museum, and film studies courses; and more generally for readers interested in how the past is represented and used in the present.

## **Ex Captivitate Salus**

When Germany was defeated in 1945, both the Russians and the Americans undertook mass internments in the territories they occupied. The Americans called their approach “automatic arrest.” Carl Schmitt, although not belonging in the circles subject to automatic arrest, was held in one of these camps in the years 1945–6 and then, in March 1947, in the prison of the international tribunal in Nuremberg, as witness and “possible defendant.” A formal charge was never brought against him. Schmitt’s way of coping throughout the years of isolation was to write this book. In *Ex Captivitate Salus*, or *Deliverance from Captivity*, Schmitt considers a range of issues relating to history and political theory as well as recent events, including the Nazi defeat and the newly emerging Cold War. Schmitt often urged his readers to view the book as though it were a series of letters personally directed to each one of them. Hence there is a decidedly personal dimension to the text, as Schmitt expresses his thoughts on his own career trajectory with some pathos, while at the same time emphasising that “this is not romantic or heroic prison literature.” This reflective work sheds new light on Schmitt’s thought and personal situation at the beginning of a period of exile from public life that only ended with his death in 1985. It will be of great value to the many students and scholars in political theory and law who continue to study and appreciate this seminal theorist of the twentieth century.

## **Utopia, Equity and Ideology in Urban Texts**

*Utopia, Equity and Ideology in Urban Texts: Fair and Unfair Cities* explores the complex interrelations of three key critical topics across a diverse range of urban writing. Interrogating the links and tensions between aesthetic and political priorities in the representation and imagining of urban life, the volume engages with work from a wide variety of linguistic and cultural origins and across a range of textual practices having the urban phenomenon as a common framing concern. Individual contributions discussing genre and literary fiction, poetic writing, documentary and essayistic texts, planning manifestos and municipal communications materials serve to demonstrate that the nuanced treatments of urban experience and potential which may be gleaned from across this textual spectrum act as a pragmatic corrective to purely conceptual approaches. As such, the volume consolidates the emerging dialogue between the fields of utopian studies and literary urban studies, understanding these as complementary approaches to the reading of the city and its textual prolongations.

## **Work Time**

*Work Time* is a sociological overview of a complex web of relations that shapes much of our experience of work and life yet often goes without critical examination. Cynthia Negrey examines work time past and present, exploring structural economic change and the gender division of labor to ask: what are the historical, cultural, public policy, and business sources of current work-time practices? Topics addressed include work-time reduction in the US culminating in the 40-hour statute of 1938, recent trends in annual and weekly

hours, overtime, part-time work, temporary employment, work-family integration, and international comparisons. She focuses on the US in a global context and explores how a new political economy of work time is taking shape. This book brings together existing knowledge from sociology, anthropology, history, labor economics, and family studies to answer its central question and will change the way upper-level students think about the time we devote to work.

## **Liquid Modernity**

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. *Liquid Modernity* concludes the analysis undertaken in Bauman's two previous books *Globalization: The Human Consequences* and *In Search of Politics*. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

## **Realm of Lesser Evil**

Winston Churchill said of democracy that it was 'the worst form of government, except for all those other forms that have been tried from time to time.' The same could be said of liberalism. While liberalism displays an unfailing optimism with regard to the capacity of human beings to make themselves 'masters and possessors of nature', it displays a profound pessimism when it comes to appreciating their moral capacity to build a decent world for themselves. As Michea shows, the roots of this pessimism lie in the idea – an eminently modern one – that the desire to establish the reign of the Good lies at the origin of all the ills besetting the human race. Liberalism's critique of the 'tyranny of the Good' naturally had its costs. It created a view of modern politics as a purely negative art – that of defining the least bad society possible. It is in this sense that liberalism has to be understood, and understands itself, as the 'politics of lesser evil'. And yet while liberalism set out to be a realism without illusions, today liberalism presents itself as something else. With its celebration of the market among other things, contemporary liberalism has taken over some of the features of its oldest enemy. By unravelling the logic that lies at the heart of the liberal project, Michea is able to shed fresh light on one of the key ideas that have shaped the civilization of the West.

## **Do States Have the Right to Exclude Immigrants?**

States claim the right to choose who can come to their country. They put up barriers and expose migrants to deadly journeys. Those who survive are labelled 'illegal' and find themselves vulnerable and unrepresented. The international state system advantages the lucky few born in rich countries and locks others into poor and often repressive ones. In this book, Christopher Bertram skilfully weaves a lucid exposition of the debates in political philosophy with original insights to argue that migration controls must be justifiable to everyone, including would-be and actual immigrants. Until justice prevails, states have no credible right to exclude and no-one is obliged to obey their immigration rules. Bertram's analysis powerfully cuts through the fog of political rhetoric that obscures this controversial topic. It will be essential reading for anyone interested in the politics and ethics of migration.

## **Digital Citizenship in a Datafied Society**

Digitization has transformed the way we interact with our social, political and economic environments. While it has enhanced the potential for citizen agency, it has also enabled the collection and analysis of

unprecedented amounts of personal data. This requires us to fundamentally rethink our understanding of digital citizenship, based on an awareness of the ways in which citizens are increasingly monitored, categorized, sorted and profiled. Drawing on extensive empirical research, *Digital Citizenship in a Datafied Society* offers a new understanding of citizenship in an age defined by data collection and processing. The book traces the social forces that shape digital citizenship by investigating regulatory frameworks, mediated public debate, citizens' knowledge and understanding, and possibilities for dissent and resistance.

## **Mortal Subjects**

This wide ranging and challenging book explores the relationship between subjectivity and mortality as it is understood by a number of twentieth-century French philosophers including Sartre, Lacan, Levinas and Derrida. Making intricate and sometimes unexpected connections, Christina Howells draws together the work of prominent thinkers from the fields of phenomenology and existentialism, religious thought, psychoanalysis, and deconstruction, focussing in particular on the relations between body and soul, love and death, desire and passion. From Aristotle through to contemporary analytic philosophy and neuroscience the relationship between mind and body (psyche and soma, consciousness and brain) has been persistently recalcitrant to analysis, and emotion (or passion) is the locus where the explanatory gap is most keenly identified. This problematic forms the broad backdrop to the work's primary focus on contemporary French philosophy and its attempts to understand the intimate relationship between subjectivity and mortality, in the light not only of the 'death' of the classical subject but also of the very real frailty of the subject as it lives on, finite, desiring, embodied, open to alterity and always incomplete. Ultimately Howells identifies this vulnerability and finitude as the paradoxical strength of the mortal subject and as what permits its transcendence. Subtle, beautifully written, and cogently argued, this book will be invaluable for students and scholars interested in contemporary theories of subjectivity, as well as for readers intrigued by the perennial connections between love and death.

## **Video Games and Spatiality in American Studies**

While video games have blossomed into the foremost expression of contemporary popular culture over the past decades, their critical study occupies a fringe position in American Studies. In its engagement with video games, this book contributes to their study but with a thematic focus on a particularly important subject matter in American Studies: spatiality. The volume explores the production, representation, and experience of places in video games from the perspective of American Studies. Contributions critically interrogate the use of spatial myths ("wilderness," "frontier," or "city upon a hill"), explore games as digital borderlands and contact zones, and offer novel approaches to geographical literacy. Eventually, *Playing the Field II* brings the rich theoretical repertoire of the study of space in American Studies into conversation with questions about the production, representation, and experience of space in video games.

## **The Material Child**

Children today are growing up in an increasingly commercialised world. But should we see them as victims of manipulative marketing, or as competent participants in consumer culture? *The Material Child* provides a comprehensive critical overview of debates about children's changing engagement with the commercial market. It moves from broad overviews of the theory and history of children's consumption to insightful case studies of key areas such as obesity, sexualisation, children's broadcasting and education. In the process, it challenges much of the received wisdom about the effects of advertising and marketing, arguing for a more balanced account that locates children's consumption within a broader analysis of social relationships, for example within the family and the peer group. While refuting the popular view of children as incompetent and vulnerable consumers that is adopted by many campaigners, it also rejects the easy celebration of consumption as an expression of children's power and autonomy. Written by one of the leading international scholars in the field, *The Material Child* will be of interest to students, researchers and policy-makers, as well as parents, teachers and others who work directly with children.

## **In Search of Politics**

We live in a world which no longer questions itself, which lives from one day to another managing successive crises and struggling to brace itself for new ones, without knowing where it is going and without trying to plan the itinerary. And everything important in our lives - livelihood, human bonds, partnerships, neighbourhood, goals worth pursuing and dangers to avoid - feels transient, precarious, vulnerable, insecure, uncertain, risky. Is there a connection between the shape of the world we inhabit and the way we live our lives? Exploring that connection, and finding out just how close it is, is the main concern of this book. What is at stake in this inquiry is the possibility of re-building the "private/public" space, where private troubles and public issues meet and where citizens engage in dialogue in order to govern themselves. Individual liberty can only be a product of collective work, it can only be collectively secured and guaranteed. And yet today we are moving towards a privatization of the means to secure individual liberty. If seen as a therapy for the present ills, this is bound to produce effects of a most sinister kind. The act of translating private troubles into public issues is in danger of falling into disuse and being forgotten. The argument of this book is that making the translation possible again is an urgent and vital imperative for the renewal of politics today. This new book by Zygmunt Bauman - one of the most original and creative thinkers of our time - will be of particular interest to students of sociology, politics and social and political theory.

## **Microdystopias**

This edited collection examines the effects that macrosystems have on the figuration of our everyday—of microdystopias—and argues that microdystopic narratives are part of a genre that has emerged in contrast to classic dystopic manifestations of world-shattering events. From different methodological and theoretical positions in fieldworks ranging from literary works and young adult series to concrete places and games, the contributors in *Microdystopias: Aesthetics and Ideologies in a Broken Moment* sound the depths of an existential sense of shrinking horizons – spatially, temporally, emotionally, and politically. The everyday encroachment on our sense of spatial orientation that gradually and discreetly diminishes the horizons of possibilities is demonstrated by examining what the forms of the microdystopic look like when they are aesthetically configured. Contributors analyze the aesthetics that play a particularly central and complex role in mediating, as well as disrupting, the parameters of dystopian emergences and emergencies, reflecting an increasingly uneasy relationship between the fictional, the cautionary, and the real. Scholars of media studies, sociology, and philosophy will find this book of particular interest.

## **A History of the Senses**

This path-breaking book examines our attitudes to the senses from antiquity through to the present day. Robert Jutte explores a wealth of different traditions, images, metaphors and ideas that have survived through time and describes how sensual impressions change the way in which we experience the world. Throughout history, societies have been both intrigued or unsettled by the five senses. The author looks at the way in which the social world conditions our perception and traces the 'rediscovery' of sensual pleasure in the twentieth century, paying attention to experiences as varied as fast food, deoderization, and extra-sensory perception. He concludes by exploring technological change and cyberspace, reflecting on how developments in these fields will affect our relationship with the senses in the future.

## **The New French Philosophy**

This book gives a critical assessment of key developments in contemporary French philosophy, highlighting the diverse ways in which recent French thought has moved beyond the philosophical positions and arguments which have been widely associated with the terms 'post-structuralism' and 'postmodernism'. These developments are assessed through a close comparative reading of the work of seven contemporary thinkers: Jean-Luc Marion, Jean-Luc Nancy, Bernard Stiegler, Catherine Malabou, Jacques Rancière, Alain Badiou

and François Laruelle. The book situates the writing of each philosopher in relation to earlier traditions of French thought. In differing ways, these philosophers decisively distance themselves from the linguistic paradigm which dominated so much twentieth-century thought in order to rethink philosophical conceptions of materiality, worldliness, shared embodied existence and human agency or subjectivity. They thereby open the way for a radical renewal of the claims, possibilities and transformative power of philosophical thinking itself. This book will be an indispensable text for students of philosophy and for anyone interested in current developments in philosophy and social thought.

## **The West and the Word**

Western expansion in North America has mainly been described as either a linear sequence energized by nineteenth-century nation-building processes at a moving frontier, or as the practice of settler colonialism and its exploitation of resources and displacement of nonwhite peoples. This book suggests that shifting the focus from this binary pattern towards spatial imaginations and spatialization processes—a new theoretical framework developed at SFB 1199—provides novel insights into the placemaking dynamics of the American West. It brings to light a discursive diversity that often contradicts unidirectional interpretive patterns. It becomes clear that while some discourses solidified into spatial metanarratives like the character-shaping clash of civilizations at the frontier or manifest destiny, alternative spatial imaginations exist juxtaposed to or obfuscated by canonical interpretations. Making use of a variety of sources (including works of literature, poetry, newspapers, paintings, and speeches) to access spatialization processes on several sociocultural scales, the book presents a careful exploration of the parameters that inform(ed) the creation, affirmation, and subversion of spatial imagination of the American West throughout the nineteenth century from the perspective of American Studies.

## **The Climate Coup**

Inaction by governments in the face of climate change is often attributed to a lack of political will or a denial of the seriousness of the situation, but as Mark Alizart argues in this provocative book, we shouldn't exclude the possibility that part of the reluctance might be motivated by cynicism and even sheer evil: for some people, there are real financial and political benefits to be gained from the chaos that will ensue from environmental disaster. The climate crisis creates its winners – individuals who orchestrate environmental chaos and bet on the collapse of the world as they bet on declining share values. In the face of this veritable 'carbofascist' coup targeting humanity, modifying our behaviour as individuals won't suffice. We must train our critical attention on those financial and political actors who speculate on catastrophe and, in the light of this, we must rethink the strategy of ecological activism. This is a war to win, not a crisis to overcome.

## **Collective Memory Narratives in Contemporary Culture**

Starting from the central importance of memory in contemporary societies, this book encourages a transdisciplinary reflection on how the "presentification of the past" is never a simple reenactment but corresponds to the interaction between memory and cultural sensitiveness, present beliefs and needs, expectations, and forecasts for the future. It studies cultural (re)construction through collective stories, including academic debates, media narratives, collective mobilizations, state narratives of history, architectural reconstructions, and artistic expressions. It looks at how technological innovations have profoundly changed the practices of conservation and dissemination of collective memory, with particular reference to cultural digitization. Finally, it shows that the relevance and selection of events, the organization of connections and cross-references between past, present, and future, as well as the importance of diversified collective imaginaries are the keys to narrative constructions of memory that prove to be sensitive and decisive for its continuity and its intergenerational transmission. This interdisciplinary collection is for students and scholars of the social sciences, cultural studies, and the humanities interested in memory studies.

## **Food**

Food is one of the most basic resources that humans need for daily survival. Forty percent of the world's population gains a livelihood from agriculture and we all consume food. Yet control over this fundamental resource is concentrated in relatively few hands. The 2008 food price crisis illustrated both the volatility and vulnerability built into the current global food system; at the height of the crisis, the number of hungry people on the planet climbed to over 1 billion. At the same time, there are serious ecological consequences that stem from an increasingly industrial model of agriculture that has spread worldwide. This book aims to contribute to a fuller understanding of the forces that influence and shape the current global food system. Author Jennifer Clapp explores how corporate control, inequitable international agricultural trade rules, and the financialization of farm commodities have each had a fundamental influence on the practices that dominate today's global food system. By contrast, farmers and consumers, particularly in the developing world, have had little voice to change the rules of the game. But movements are emerging to challenge the dominant global system. The extent to which these alternative movements can displace it, however, remains to be seen.

## **Wasted Lives**

The production of 'human waste' – or more precisely, wasted lives, the 'superfluous' populations of migrants, refugees and other outcasts – is an inevitable outcome of modernization. It is an unavoidable side-effect of economic progress and the quest for order which is characteristic of modernity. As long as large parts of the world remained wholly or partly unaffected by modernization, they were treated by modernizing societies as lands that were able to absorb the excess of population in the 'developed countries'. Global solutions were sought, and temporarily found, to locally produced overpopulation problems. But as modernization has reached the furthest lands of the planet, 'redundant population' is produced everywhere and all localities have to bear the consequences of modernity's global triumph. They are now confronted with the need to seek – in vain, it seems – local solutions to globally produced problems. The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival, but the planet is fast running out of places to put them. Hence the new anxieties about 'immigrants' and 'asylum seekers' and the growing role played by diffuse 'security fears' on the contemporary political agenda. With characteristic brilliance, this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with 'human waste' provides a key for understanding some otherwise baffling features of our shared life, from the strategies of global domination to the most intimate aspects of human relationships.

## **Rethinking Democracy for Post-Utopian Worlds**

This book is both a conceptualization and detailed analysis of the current crisis in which modern utopian categories of political institutions find themselves, as well as a reflection and clarification of the new dangers and opportunities facing post-utopian politics in-the-making. Met with those who believe that no more utopian political projects are possible, the post-utopian movement maintains a non-fantastic or illusory character of being able to apply new great discourses and radically democratic historical narratives, while respecting both the autonomy and emancipation of individuals as plurality and the socio-cultural differences of communities. With this purpose in mind, the book is divided into five thematically differentiated sections: the new utopian categories beyond modern epistemes; the possibility of liberal utopian democracies without neoliberalism; the opportunities of socialist empowerments and insurgencies; the necessity of thinking in the space between two ages; and the urgency to create eco-political post-utopias.

## **Dispossession**

Dispossession describes the condition of those who have lost land, citizenship, property, and a broader belonging to the world. This thought-provoking book seeks to elaborate our understanding of dispossession outside of the conventional logic of possession, a hallmark of capitalism, liberalism, and humanism. Can

dispossession simultaneously characterize political responses and opposition to the disenfranchisement associated with unjust dispossession of land, economic and political power, and basic conditions for living? In the context of neoliberal expropriation of labor and livelihood, dispossession opens up a performative condition of being both affected by injustice and prompted to act. From the uprisings in the Middle East and North Africa to the anti-neoliberal gatherings at Puerta del Sol, Syntagma and Zucchotti Park, an alternative political and affective economy of bodies in public is being formed. Bodies on the street are precarious - exposed to police force, they are also standing for, and opposing, their dispossession. These bodies insist upon their collective standing, organize themselves without and against hierarchy, and refuse to become disposable: they demand regard. This book interrogates the agonistic and open-ended corporeality and conviviality of the crowd as it assembles in cities to protest political and economic dispossession through a performative dispossession of the sovereign subject and its propriety.

## **Popular Culture in Ancient Rome**

The mass of the Roman people constituted well over 90% of the population. Much ancient history, however, has focused on the lives, politics and culture of the minority elite. This book helps redress the balance by focusing on the non-elite in the Roman world. It builds a vivid account of the everyday lives of the masses, including their social and family life, health, leisure and religious beliefs, and the ways in which their popular culture resisted the domination of the ruling elite. The book highlights previously under-considered aspects of popular culture of the period to give a fuller picture. It is the first book to take fully into account the level of mental health: given the physical and social environment that most people faced, their overall mental health mirrored their poor physical health. It also reveals fascinating details about the ways in which people solved problems, turning frequently to oracles for advice and guidance when confronted by difficulties. Our understanding of the non-elite world is further enriched through the depiction of sensory dimensions: Toner illustrates how attitudes to smell, touch, and noise all varied with social status and created conflict, and how the emperors tried to resolve these disputes as part of their regeneration of urban life. *Popular Culture in Ancient Rome* offers a rich and accessible introduction to the usefulness of the notion of popular culture in studying the ancient world and will be enjoyed by students and general readers alike.

## **Intimations of Nostalgia**

This volume investigates the relationship between nostalgia and contemporary social issues. From history and political theory to marketing and media, each chapter discusses the way nostalgia has been presented within a specific disciplinary context and shows how nostalgia as a topic of research has evolved over time.

## **On Education**

What is the role of education in a world where we no longer have a clear vision of the future and where the idea of a single, universal model of humanity seems like the residue of a bygone age? What role should educators play in a world where young people find themselves faced with deep uncertainty about their future, where the prospects of securing a stable, long-term career seem increasingly remote and where intensified population movements have created more diverse communities in which different cultures find themselves living side by side, no longer bound together by the belief that the other would eventually be assimilated into 'our' culture? Faced with the bewildering features of our liquid modern world, many young people are inclined to withdraw - in some cases into the online world of games and virtual relationships, in other cases into anorexia, depression, alcohol or even drug abuse, hoping to find shelter from a world perceived as more and more dangerous. Others launch into more violent forms of behaviour, like street gangs and the looting carried out by young people who have been excluded from the temples of consumption but are eager to participate in the ceremony. And all this happens while our politicians look on, uncomprehending and indifferent. In this short book Zygmunt Bauman - the leading social theorist of our liquid modern world, here in conversation with Riccardo Mazzeo - reflects on the predicament of young people today and on the role of education and the educator in a world where the certainties of our predecessors can no longer be taken for

granted.

## **Children and the Internet**

A major new contribution to the hot topic of children and the internet from one of the world's leading researchers in this area. It considers children's everyday practices of internet use in relation to the complex socio-cultural conditions of contemporary childhood.

## **Screening American Nostalgia**

This book examines American screen culture and its power to create and sustain values. Looking specifically at the ways in which nostalgia colors the visions of American life, essays explore contemporary American ideology as it is created and sustained by the screen. Nostalgia is omnipresent, selling a version of America that arguably never existed. Current socio-cultural challenges are played out onscreen and placed within the historical milieu through a nostalgic lens which is tempered by contemporary conservatism. Essays reveal not only the visual catalog of recognizable motifs but also how these are used to temper the uncertainty of contemporary crises. Media covered spans from 1939's *Gone with the Wind*, to *Stranger Things*, *The Americans*, *Twin Peaks*, the *Fallout* franchise and more.

## **Liquid Racism**

Bauman argues that our lives are ruled by ambivalence. In this ambiguous world, liquified social structures can create an anxiety towards the 'other.' This innovative book takes Bauman's notions of 'liquid modernity' one step further to develop a theory of 'liquid racism'. The authors show that while post-race theory argues that society is moving beyond racism, in reality, historical manifestations of racism continue. Except, society is now faced with a racism whose structures have changed. Examining Brexit, education and black youth culture as case studies to reveal the application of liquid racism, this book makes a major contribution to our understanding of the (un)changing nature of racism.

## **Cosmos and Republic**

In 20 essays inspired by Hannah Arendt's analysis of crisis-ridden modernity, Wolfgang R. Heuer addresses aspects of depoliticization and the loss of politics, and thus of freedom. The wide-ranging essays are grouped in five sections: *When Politics Vanishes*, *The Call of Responsibility*, *Images and Emotions*, *Federations*, and *From Plurality to Cosmos*. They lead to the insight that the crises of our time require a common change of perspective towards ecological and political sustainability, the unity of »Cosmos and Republic«.

## **The Revival of Political Imagination**

The *Revival of Political Imagination* offers a unique examination of the methodological aspects of utopia. Discussing utopia as a tool for social criticism, method and imaginative spaces - rather than in terms of its content - this volume analyses the function of utopias, to develop utopias as methodology and to show how instrumental utopian modes of thought can be in such diverse fields such as education, labour, and housing. Including discussions of traditional and contemporary utopias, as well as various forms of expression of utopian hope, from literature to social science and cultural practices, *The Revival of Political Imagination* is both analytical and practical in its elucidation of how political theory can function to foster our imaginative skills.

## **Making the Familiar Unfamiliar**

Shortly before his death, Zygmunt Bauman spent several days in conversation with the Swiss journalist Peter

Haffner. Out of these conversations emerged this book in which Bauman shows himself to be the pre-eminent social thinker for which he became world renowned, a thinker who never shied away from addressing the great issues of our time and always strove to interrogate received wisdom and common sense, to make the familiar unfamiliar. As in Bauman's work more generally, the personal and the political are interwoven in this book. Bauman's life, which followed the same trajectory as the social and political upheavals of the 20th century, left its trace on his thought. Bauman describes his upbringing in Poland, military service in the Red Army, working for the Polish Secret Service after the war and expulsion from Poland in 1968, providing personal accounts of the historical events on which he brings his social and political insights to bear. His reflections on history, identity, Jewishness, morality, happiness and love are rooted in his own personal journey through the turbulent events of the 20th century to which he bore witness. These last conversations shed new light on one of the greatest social thinkers of our time, offering a more personal perspective on a man who changed our way of thinking about the modern world.

## **The Anthem Companion to Zygmunt Bauman**

This edited volume will illustrate the continuing interest in Bauman's work through a number of chapters each dealing with the important aspects of his work and shedding light on some new angles and perspectives on his life and work. It seeks to position Bauman within the field of sociology and to provide some examples of his lasting contribution to and relevance for the discipline. Bauman's ideas remain an important source of inspiration for many scholars and researchers working within a variety of different fields and sub-fields, appealing equally to empirical work and theoretical elaboration. This book contains ten chapters, and all chapters are devoted to the presentation and discussion of themes and ideas that were characteristic of Bauman's way of doing and writing. The purpose of this volume – as with the other volumes published in the Anthem Press 'Companion to Sociology' series – is to provide a comprehensive overview of Zygmunt Bauman's continued importance within the field of sociology and related social science disciplines.

## **The Emerald Guide to Zygmunt Bauman**

This book is the first introductory guide to the work of Zygmunt Bauman, designed specifically for students and those new to his work. It provides a firm foundation for the independent reading of Bauman and for exploring the many interpretations of his influential ideas.
