Industrial Tourism

Industrial tourism presents opportunities, both in terms of income and as a tool of management, for individual firms who open their doors - and consequently their local regions - to the public. But how can these opportunities be organised in a way that enables both the city and the enterprise to take advantage? This book analyzes the conditions for successful industrial tourism development using case studies of Wolfsburg, Cologne, Pays de la Loire, Turin, Shanghai and Rotterdam, and makes astute recommendations for cities and companies with ambitions in this field.

Passion in the Piazza

Torino are one of the world's most dramatic and interesting football clubs. Peter Bourne charts the drama and suspense of the summer of 2005 which saw the death and rebirth of the club, placing it within the context of Torino's rich and tragic history. Torino became the first team to be demoted after gaining promotion, have witnessed the death of star players and in 1949 Italy's greatest ever club side wiped out in an air tragedy. This coupled with the passion and resilience of Torino supporters, the epic and lopsided rivalry with Juventus and with the fact that until 1995, Torino had always been one of Italy's top five clubs. The fall and rise of Torino is also placed into context with the unique nature of sport in Italy, the other significant scandals which shocked and paralysed Italian football during the summer of shame and within the context of Turin, a city preparing nervously for the XX Olympic Winter Games in February 2006.

The Brave Coward

This collection of interdisciplinary essays introduce the history and culture of the lands ruled by the sovereign house of Savoy during the late medieval and early modern periods, territories now part of France, Italy, and Switzerland. Because the Sabaudian realms were geographically, linguistically, and culturally diverse and did not evolve into a single modern nation-state, their early history has been overlooked by historians whose perspectives were often informed by a narrow, national framework. An international team of scholars offers new research that de-provincializes many of the existing rich scholarly assessments of the historical significance of these lands, which were important for rulers and subjects throughout early modern Europe. The volume explores the concept of "Sabaudian studies" and identifies historiographic developments and current trends in the field. Beginning with the geography and the history of the area, the essays examine Sabaudian political culture (diplomatic practice, judicial institutions, and political thought), dynastic representation (court festivals and celebrations, and the projection of dynastic prestige abroad, with attention to the sacred heritage of the house), and territorial domination (its fiscal, religious, feudal, and composite dimensions). Contributors include Eva Pibiri, Laurent Perrillat, Rebecca Boone, Alessandro Celi, Thalia Brero, Stéphane Gal and Preston Perluss, Michel Merle, Toby Osborne, Kristine Kolrud, Guido Alfani, Marco Battistoni, Matthew Vester, and Blythe Alice Raviola.

Relive Ford's glory days in the muscle car era in this stunning new volume covering the popular and powerful Cobra Jets! Ford's "Total Performance" racing program in the early 1960s was the first stone turned in the task of repurposing its image to the youth market. The introduction of the Mustang increased that exponentially, but even in 289 Hi-Po form it was no match for the Pontiac GTO or other muscle cars. Neither was the 1966 Fairlane GT or subsequent 390 Mustang the following year. But when the 428 Cobra Jet Mustang debuted at Pomona for the NHRA Winternationals in 1968, that image evolved from wholesome to

fearsome! Cobra Jet Mustangs downed all comers and took the vaunted Super Stock Eliminator crown while introducing a new weapon under the hood to serve as fair warning to what was to be uncoiled at the stoplight. By the next model year with the revolutionary shaker hood on Cobra Jet-equipped Mach Is and the striking snake adorning the sheet metal of the midsize Cobra, Ford's image makeover was complete. The demise of the muscle car era didn't signify the end of the Cobra Jet, as Ford continued the performance reign with the 351 Cobra Jet. The legacy left by Mustang, Cougar, Torino, Cyclone, and Ranchero 428, 429, and 351 Cobra Jet-powered vehicles is indelible. Mustang Monthly editor Rob Kinnan and muscle car expert Diego Rosenberg bring this history back to life in an all-encompassing book that is the first to specifically feature all Cobra Jet cars, including the purpose-built drag cars of today! Cobra Jet: The History of Ford's Greatest High Performance Cars will hypnotize you as the first and complete history of Ford's most famous engines during the era's peak.

The last two centuries have been the scene of dramatic change throughout Europe. And one of the main causes of these tremendous and spectacular changes was the economy. These transformations were achieved by people: scientists and political thinkers, inventors and entrepreneurs, educators, skilled and educated workers. Who not only invented machines and computers, but were able to renew economic and political systems. This volume, therefore, presents a new approach to the period by looking at case studies to understand how these changes came about and the impact they had on modern Europe. Ivan Berend presents the spectacular history of modern European economy as a chain of "small" events, actions, and the ideas of individuals, as the influence of institutions and bold entrepreneurs. The essays are grouped into six chapters and discuss the power of entrepreneurship; the power of institutions; economic regimes and the permanent renewal of capitalism; the power of ideas and inventions; pioneering companies; from the rise of industrial cities to post-industrial suburbanization; bubbles, great depressions and economic cycles. All of the single episodes and personal stories offer a cross-section of the complex and interrelated history of modern Europe. Case Studies on Modern European Economy will be essential reading for students of economic and modern European history.
