Photography: Going Film Pro I: Revisiting the Nikon F4

Photography has gone through at least seven revolutions since it began. Each one has occurred at some crucial moment in history and has changed the way we make photographs. The design of the Nikon F4 was the basis, the prototype for all DSLR cameras to come. If you use a DSLR at any level, it's granddad was the F4. That said, the Nikon F4 still is a film camera and that requires a different mindset that shooting with a DSLR. With film, I take my time. I know the images are going to be - or at least are meant to be - special. Since I am shooting film with the Nikon F4 in the second decade of the 21st century, I also know the images are going to be different than what most people shoot. The Nikon F4 is such an elegant work of art itself, it helps me to think more artistically when I create photographs. It's just one of those few cameras that is beautiful to behold and a joy to use.

Real-time Knowledge-based Fuzzy Logic Model for Soft Tissue Deformation

This book provides a real-time and knowledge-based fuzzy logic model for soft tissue deformation. The demand for surgical simulation continues to grow, as there is a major bottleneck in surgical simulation designation and every patient is unique. Deformable models, the core of surgical simulation, play a crucial role in surgical simulation designation. Accordingly, this book (1) presents an improved mass spring model to simulate soft tissue deformation for surgery simulation; (2) ensures the accuracy of simulation by redesigning the underlying Mass Spring Model (MSM) for liver deformation, using three different fuzzy knowledge-based approaches to determine the parameters of the MSM; (3) demonstrates how data in Central Processing Unit (CPU) memory can be structured to allow coalescing according to a set of Graphical Processing Unit (GPU)-dependent alignment rules; and (4) implements heterogeneous parallel programming for the distribution of grid threats for Computer Unified Device Architecture (CUDA)-based GPU computing.
