## Liskov substitution principle

The Liskov substitution principle (LSP) is a particular definition of a subtyping relation, called strong behavioral subtyping, that was initially introduced...

## Open–closed principle

In object-oriented programming, the open–closed principle (OCP) states "software entities (classes, modules, functions, etc.) should be open for extension...

## Circle–ellipse problem

programming (OOP). By definition, this problem is a violation of the Liskov substitution principle, one of the SOLID principles. The problem concerns which subtyping...

## Single-responsibility principle

## Dependency inversion principle

the dependency inversion principle is a specific methodology for loosely coupled software modules. When following this principle, the conventional dependency...

## **Class-based programming**

the principle of subtyping, known as the Liskov substitution principle, does not hold. Barbara Liskov and Jeannette Wing formulated the principle succinctly...
