NEW YORK TIMES BESTSELLER • A “brilliant [and] entrancing” (The Guardian) journey into the hidden lives of fungi—the great connectors of the living world—and their astonishing and intimate roles in human life, with the power to heal our bodies, expand our minds, and help us address our most urgent environmental problems. “Grand and dizzying in how thoroughly it recalibrates our understanding of the natural world.”—Ed Yong, author of *An Immense World* ONE OF THE BEST BOOKS OF THE YEAR—Time, BBC Science Focus, The Daily Mail, Geographical, The Times, The Telegraph, New Statesman, London Evening Standard, Science Friday When we think of fungi, we likely think of mushrooms. But mushrooms are only fruiting bodies, analogous to apples on a tree. Most fungi live out of sight, yet make up a massively diverse kingdom of organisms that supports and sustains nearly all living systems. Fungi provide a key to understanding the planet on which we live, and the ways we think, feel, and behave. In the first edition of this mind-bending book, Sheldrake introduced us to this mysterious but massively diverse kingdom of life. This exquisitely designed volume, abridged from the original, features more than one hundred full-color images that bring the spectacular variety, strangeness, and beauty of fungi to life as never before. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life’s processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. Winner of the Wainwright Prize, the Royal Society Science Book Prize, and the Guild of Food Writers Award • Shortlisted for the British Book Award • Longlisted for the Rathbones Folio Prize

Entangled Performance Histories is the first book-length study that applies the concept of "entangled histories" as a new paradigm in the field of theater and performance historiography. "Entangled histories" denotes the interconnectedness of multiple histories that cannot be addressed within national frameworks. The concept refers to interconnected pasts, in which historical processes of contact and exchange between performance cultures affected all involved. Presenting case studies from across the world—spanning Africa, the Arab-speaking world, Asia, the Americas and Europe—the book's contributors systematically expand, exemplify and examine the concept of "entangled histories," thus introducing various innovative concepts, theories and methodologies for investigating reciprocally consequential processes of interweaving performance cultures from the past. Bringing together examples of entanglements in theater and performance histories from a broad variety of geographical and historical backgrounds, the book's contributions build together a broad basis for a possible and necessary paradigmatic shift in the field of theater and performance historiography. Ideal for researchers and students of history, theater, performance, drama and dance, this volume opens novel perspectives on the possibilities and challenges of investigating the entangled histories of theater and performance cultures on a global scale.

"This is a substantial revision of the first edition. Perhaps most importantly I have now included a chapter on human to human entanglements and have pulled human relations more into the center of entanglements. This results from my critique of the notion of symmetry between humans and things that has widely been touted in recent years in archaeology and related disciplines but has raised ethical issues with which I concur and discuss in this volume. Another important change is that I have, after further thought, retreated from the

notion of 'things-in-themselves' and from the object nature of things. I was wrong in the first edition to argue that things can exist outside their relations. The result is a more fully relational stance. I have also paid greater attention to flows and temporality. The greater focus on relationality is underpinned by a recognition that all things and humans are in flux. Change through time undermines notions of the fixed spatial extension of things. There is thus greater attention paid to the forces that generate flows, and an overall shift from being to becoming\"--

\\"Fear is always experienced individually, and few experiences are as personal. There can be no collective fear without individual fear preceding it. A society's fear is born out of the convergence of individual experiences, when dozens, hundreds, thousands, and millions of people are afraid of the same thing at the same time.\" This is a story about postwar Polish society and its emotions. This is a story of heroes: soldiers, deserters, orphans, and beggars. Now available in English for the first time, Entangled in Fear reveals the broken society where bandits, hunger, bombs, Russia, and countless other threats had an immense influence on Poles as they struggled through the wreckage caused by World War II. Journalist and historian Marcin Zaremba uses sociology, psychology, and history to explore collective fear in official documents and the personal papers of those who were left to survive in postwar Poland. In doing so, he reveals how fear of famine and epidemics, sexual violence and looting, joblessness and invasion led directly to collective action on the part of Poles. A groundbreaking work, Entangled in Fear challenges the reader to consider how emotions have shaped human history and how a more serious engagement with emotions is key to a fuller understanding of the past.

These stars of ours were written in darkness and bound with light? I fell in love with them thirty-five million heartbeats apart and an ocean away. One shaped me at the scratch of a pen and the other remade me with the strum of a note. And the truth is that I loved them both, desperately. I never foresaw our worlds colliding. How the past and present would crash together and leave us with nothing but a blinding kaleidoscope of pain. How the threads of all of our fates were already so inextricably intertwined from the moment of those first meetings. And maybe my selfishness is unforgivable? of being unable to choose. But they were both selfish enough to love me too. Even when they shouldn't have. That's what they don't tell you about love though. That it can be a selfish thing, never ending in its demand for the infinity of that one person. Or, in my case, two. And maybe that makes it okay? or maybe it just makes all of our actions all the more unforgivable. Maybe we all should have been better. I'll let you decide. This book uniquely explores the shifting structures of power and unexpected points of intersection – entanglements – at the nexus of North and South as a lens through which to examine the impact of global and local circuits of people, practices and ideas on linguistic, cultural and knowledge systems. The volume considers the entanglement of North and South on multiple levels in the contemporary and continuing effects of capitalism, colonialism, and imperialism, in the form of silenced or marginalized populations, such as refugees, immigrants, and other minoritised groups, and in the different orders of visibility that make some types of practices and knowledge more legitimate and therefore more visible. It uses a range of methodological and analytical frames to shed light on less visible histories, practices, identities, repertoires, and literacies, and offer new understandings for research and for language, health care, education, and other policies and practices. The book brings together an exciting mix of voices of both established and new scholars in multilingualism and diversity from a range of social, political, and historical contexts and provides coverage of areas previously underrepresented in current research on multilingualism, globalization, and mobility, including Brazil, South Africa, Australia, East Timor, Wallis and Mayotte, Cape Verde and Guinea-Bissau. This volume is key reading for scholars, researchers, and graduate students in multilingualism, globalisation, sociolinguistics, mobility and development studies, applied linguistics, and language and education policy.

The exchange of landscape practice between China and Europe from 1500–1800 is an important chapter in art history. While the material forms of the outcome of this exchange, like *jardin anglo-chinois* and *Européenerie* are well documented, this book moves further to examine the role of the exchange in identity formation in early modern China and Europe. Proposing the new paradigm of “entangled landscapes”, drawing from the concept of “entangled histories”, this book looks at landscape design, cartography, literature, philosophy and material culture of the period. Challenging simplistic, binary treatments of the movements of “influences” between China and Europe, *Entangled Landscapes* reveals how landscape exchanges entailed complex processes of appropriation, crossover and transformation, through which Chinese and European identities were formed. Exploring these complex processes via three themes—empire building, mediators’ constraints, and aesthetic negotiations, this work breaks new ground in landscape and East-West studies. Interdisciplinary and revisionist in its thrust, it will also benefit scholars of history, human geography and postcolonial studies.

Viennese popular culture at the turn of the twentieth century was the product of the city's Jewish and non-Jewish residents alike. While these two communities interacted in a variety of ways to their mutual benefit, Jewish culture was also inevitably shaped by the city's persistent bouts of antisemitism. This fascinating study explores how Jewish artists, performers, and impresarios reacted to prejudice, showing how they articulated identity through performative engagement rather than anchoring it in origin and descent. In this way, they attempted to transcend a racialized identity even as they indelibly inscribed their Jewish existence into the cultural history of the era.

The Insider-Outsider Theory of Employment and Unemployment

The authors of this book focus on transcultural entanglements in Manchuria during the first half of the twentieth century. Manchuria, as Western historiography commonly designates the three northeastern provinces of China, was a politically, culturally and economically contested region. In the late nineteenth century, the region became the centre of competing Russian, Chinese and Japanese interests, thereby also attracting global attention. The coexistence of people with different nationalities, ethnicities and cultures in Manchuria was rarely if ever harmoniously balanced or static. On the contrary, interactions were both dynamic and complex. Semi-colonial experiences affected the people's living conditions, status and power relations. The transcultural negotiations between all population groups across borders of all kinds are the subject of this book. The chapters of this volume shed light on various entangled histories in areas such as administration, the economy, ideas, ideologies, culture, media and daily life.

Entangled Entertainers

Based on 15 years of ethnographic fieldwork, the book understands the increasing violence seen in cities as a product of the emergence of transnational illegal markets since the 1970's, followed by the suppression of unskilled workers, in many places racialised young men from poor neighbourhoods. The book gives flesh

and blood to these transformations through a careful study of Sao Paulo's case in Brazil. The first part of the book is based on the trajectories of three families, featuring young men affiliated with illegal markets such as drug dealing and car theft, although in very different situations. The clash between the everyday life patterns of these black families, compared to Sao Paulo's white middle classes, gives plausibility to the city's social conflict, most violent after the 80's, when transnational markets arrive and incarceration grows. Sao Paulo's case offers more: this conflict is 70% less lethal in 2017 than it was in the 2000, mostly due to the actions of the PCC (the main criminal group in Brazil, a transnational one) discussed in the second part of the book. The \"world of crime\" is stronger, yet at the same time homicide rates are falling. The final argument demonstrates that informality, illegality and criminal violence are produced entangling legal and illegal markets and formal/informal institutions, not only in Sao Paulo.
