Flood Hazard Mitigation - Flood Hazard Mitigation 3 minutes, 57 seconds - Thurston County received a **Hazard Mitigation**, Grant through the Federal Emergency Management Agency and State Emergency ...

Before elevating the house, the porches are braced to keep them attached to the house during the raising process.

Many trenches were hand dug so that the steel beams could be installed under the house, since the house did not have a crawl space.

A hydraulic lift system was used to elevate the house.

The home is up and braced with blocking. The utilities are reconnected. Power was never lost during the elevation process.

Pre-elevation mark that the bottom of the floor joist must be elevated to

The concrete block wall is being built per the engineering design.

Home placed on new foundation, porches and carport reconnected, and new stairs built.

The Role of GIS in Flood Hazard Identification, Analysis, and Solutions (April 2, 2024) - The Role of GIS in Flood Hazard Identification, Analysis, and Solutions (April 2, 2024) 1 hour, 1 minute - Part of URISA's Climate Change \u0026amp; Community Resilience Series, this webinar provided an **overview**, of the role geospatial ...
