## Gentleman Overboard

Gentleman Overboard, first published in 1937, is a novella about a man (a Wall Street banker) who accidentally slips overboard while on a freighter-cruise ship bound from Honolulu to Panama City. The book moves back and forth between the thoughts of the man in the water as he comes to terms with his inevitable fate, and that of the ship's crew and fellow passengers, who search first the ship, then the sea. Gentleman Overboard was the first novel of author Herbert Clyde Lewis (1909-1950) who would go on to write three additional books. Lewis began his career as a journalist in China and New York City, followed by a time writing screenplays in Hollywood.

## The Recovery Book

“A classic. Read it. Use it. It can help guide you step by step into the bright light of the world of recovery.” —from the Foreword by Harry Haroutunian, M.D., Physician Director, Betty Ford Center “The Recovery Book is the Bible of recovery. Everything you need to know you will find in here.” —Neil Scott, host, Recovery Coast to Coast radio Hope, support, and a clear road map for people with drug or alcohol addiction. Announcing a completely revised and updated second edition of The Recovery Book, the Bible of addiction recovery. The Recovery Book provides a direct and easy-to-follow road map to every step in the recovery process, from the momentous decision to quit to the emotional, physical, and spiritual issues that arise along the way. Its comprehensive and effective advice speaks to people with addiction, their loved ones, and addiction professionals who need a proven, trusted resource and a supportive voice. The new edition of The Recovery Book features the revolutionary Recovery Zone System, which divides a life in recovery into three chronological zones and provides guidance on exactly what to do in each zone. First is the Red Zone, where the reader is encouraged to stop everything, activate their recovery and save their life. Next is the Yellow Zone, where the reader can begin to rebuild a life that was torn apart by addiction. Finally, the reader reaches the Green Zone, where he can enjoy a life a recovery and help others. Readers also learn how to use the Recovery Zone ReCheck, a simple, yet very effective relapse prevention tool. The Recovery Zone System works hand-in-hand with the 12-step philosophy and all other recovery methods. In addition, The Recovery Book covers new knowledge about addiction mechanisms and neuroplasticity, explaining how alcohol and drugs alter the brain. The authors outline a simple daily practice, called TAMERS, that helps people to use those same processes to “remold their brains” around recovery, eventually making sobriety a routine way of life. Written by Al J. Mooney, M.D., a recovery activist who speaks internationally on recovery, and health journalists Catherine Dold and Howard Eisenberg, The Recovery Book covers all the latest in addiction science and recovery methods. In 26 chapters and over 600 pages, The Recovery Book tackles issues such as: Committing to Recovery: Identifying and accepting the problem; deciding to get sober. Treatment Options: Extensive information on all current options, and how to choose a program. AA and other 12-Step Fellowships: How to get involved in a mutual-support group and what it can do for you. Addiction Science and Neuroplasticity: How alcohol and drugs alter pathways in the brain, and how to use the same processes to remold the brain around recovery. Relapse Prevention: The Recovery Zone ReCheck, a simple new technique to anticipate and avoid relapses. Rebuilding Your Life: How to handle relationships, socializing, work, education, and finances. Physical and Mental Health: Tips for getting healthy; how to handle common ailments. Pain Control: How to deal with pain in recovery; how to avoid a relapse if you need pain control for surgery or emergency care. Family and Friends: How you can help a loved one with addiction, and how you can help yourself. Raising Substance-Free Kids: How to “addiction-proof” your child. The Epidemic of Prescription Drugs: Now a bigger problem than illegal drugs. Dr. Al J. Mooney has been helping alcoholics and addicts get their lives back for more than thirty years, using both his professional and personal experiences at his family’s treatment center, Willingway, and most recently through his work as medical

director for The Healing Place of Wake County (NC), a homeless shelter. The Recovery Book will help millions gain control of their mind, their body, their life, and their happiness. [www.TheRecoveryBook.com](http://www.TheRecoveryBook.com)

## **Recovery**

“An essential book for our times, full of wisdom, compassion and sound advice. Every patient needs a copy of this gem.” –Katherine May, author of *Wintering and Enchantment* A gentle, expert guide to the secrets of recovery, showing why we need it and how to do it better For many of us, time spent in recovery—from a broken leg, a virus, chronic illness, or the crisis of depression or anxiety—can feel like an unwelcome obstacle on the road to health. Modern medicine too often assumes that once doctors have prescribed a course of treatment, healing takes care of itself. But recovery isn't something that “just happens.” It is an act that we engage in and that has the potential to transform our lives, if only we can find ways to learn its rhythms and invest our time, energy, and participation. Drawing on thirty years of medicine, and on insights from practitioners, psychologists, and writers across history, physician Gavin Francis delivers a profound, practical, and deeply hopeful guide to recovery. Rejecting the idea that healing is passive, Recovery offers tools and wisdom for convalescence, and shows how tending to our bodies, environments, and perspectives can help us move through the landscape of illness—and come out the other side whole.

### **Full Recovery**

You've been able to stay alcohol and drug free for a period of time, but something's still missing. Addiction is a physical, spiritual, and emotional disease. Detox deals with the physical aspect, and a 12-step or some other type of spiritually based program teaches you how to remain abstinent. But what about the emotional or mental challenges that must be overcome? Are you ready to move beyond financial scarcity? Are you floundering in an unfulfilling career or personal relationship? These real-world challenges often lead to an uninspired, mediocre recovery and can be major contributors to relapse. It's time to move forward, discover your life's purpose, and reach your full potential. This book is designed to help you design an action plan, create momentum, and achieve results. The universal truths presented here have taken me from being a low-bottom alcoholic/addict to a successful entrepreneur and author with twenty years of continuous sobriety. The suggestions and exercises I present have worked for me and countless others. They will work for you if you choose to let them. So you're sober; what's next? No doubt you achieved sobriety with guidance from someone who knew how to get and stay sober. I speak your language; let me do the same for you on the next step to full recovery. Let me be your life coach on your journey to abundance. Everyone loves a great comeback story. Achieving full recovery is the greatest comeback story you'll ever tell because it will be your own.

### **Recovery, Analysis, and Identification of Commingled Human Remains**

Mass fatality events can result in the intermixing, or commingling, of human remains. Commingling of human remains presents an added challenge to all phases of the forensic process. As the number of individuals increases, so does the complexity of the forensic investigation and the skills needed for case resolution. In *Recovery, Analysis, and Identification of Commingled Human Remains*, top professionals illustrate successful techniques for sorting and determining the number of individuals, the role of DNA, ethical considerations and data management. Instrumental to the forensic community, *Recovery, Analysis, and Identification of Commingled Human Remains* provides case examples and an in depth review of experiences, methods, and research related to commingling.

When installing or servicing an air conditioning or refrigeration system, two of the most important tasks performed by technicians are refrigerant recovery and system evacuation. In order to perform these tasks properly, and in a safe manner, technicians need to understand the theory behind them, having a working knowledge of the equipment and tools used, and employ accepted industry best practices. This e-book walks through each step of both tasks, while covering safety, theory, and application. Also covered are leak detection methods and filter drier use. System Recovery and Evacuation was written by HVACR instructors for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system evacuation, leak detection, and filter driers. It is full of color illustrations and includes worksheets that provide students and practicing technicians with the information and knowledge necessary to

accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual.

Concrete Solutions contains the contributions from some 30 countries to Concrete Solutions, the 6th International Conference on Concrete Repair (Thessaloniki, Greece, 20-23 June 2016). Strengthening and retrofitting are major themes in this volume, with NDT and electrochemical repair following closely, discussing the latest advances and technologies in concrete repair. The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly. Concrete Solutions is an essential reference work for those working in the concrete repair field, from engineers to architects and from students to clients. The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St. Malo, France in association with INSA Rennes. Subsequent conferences have seen the Series partnering with the University of Padua (Italy) in 2009, with TU Dresden (Germany) in 2011 and with Queen's University Belfast (Northern Ireland) in 2014. In 2016 Thessaloniki (Greece) hosted the conference, partnering with both Aristotle University of Thessaloniki (AUTH) and Democritus University of Thrace (DUTH). The next conference in the series will be held in 2019 in Istanbul.
