What Is a People?

What Is a People? seeks to reclaim "people" as an effective political concept by revisiting its uses and abuses over time. Alain Badiou surveys the idea of a people as a productive force of solidarity and emancipation and as a negative tool of categorization and suppression. Pierre Bourdieu follows with a sociolinguistic analysis of "popular" and its transformation of democracy, beliefs, songs, and even soups into phenomena with outsized importance. Judith Butler calls out those who use freedom of assembly to create an exclusionary "we," while Georges Didi-Huberman addresses the problem of summing up a people with totalizing narratives. Sadri Khiari applies an activist's perspective to the racial hierarchies inherent in ethnic and national categories, and Jacques Rancière comments on the futility of isolating theories of populism when, as these thinkers have shown, the idea of a "people" is too diffuse to support them. By engaging this topic linguistically, ethnically, culturally, and ontologically, the voices in this volume help separate "people" from its fraught associations to pursue more vital formulations. Together with Democracy in What State?, in which Giorgio Agamben, Alain Badiou, Daniel Bensaid, Wendy Brown, Jean-Luc Nancy, Jacques Rancière, Kristin Ross, and Slavoj Žižek discuss the nature and purpose of democracy today, What Is a People? expands an essential exploration of political action and being in our time.

I Am the People

Partha Chatterjee reconsiders the concept of popular sovereignty in order to explain today's dramatic outburst of movements claiming to speak for "the people." To uncover the roots of populism, Chatterjee traces the twentieth-century trajectory of the welfare state and neoliberal reforms.

Compelling People

Required reading at Harvard Business School and Columbia Business School. Everyone wants to be more appealing and effective, but few believe we can manage the personal magnetism of a Bill Clinton or an Oprah Winfrey. John Neffinger and Matthew Kohut trace the path to influence through a balance of strength (the root of respect) and warmth (the root of affection). Each seems simple, but only a few of us figure out the tricky task of projecting both at once. Drawing on cutting-edge social science research as well as their own work with Fortune 500 executives, members of Congress, TED speakers, and Nobel Prize winners, Neffinger and Kohut reveal how we size each other up—and how we can learn to win the admiration, respect, and affection we desire.

The Book of Other People

The Book of Other People is just that: a book of other people. Open its covers and you'll make a whole host of new acquaintances. Nick Hornby and Posy Simmonds present the ever-diverging writing life of Jamie Johnson; Hari Kunzru twitches open his net curtains to reveal the irrepressible Magda Mandela (at 4:30a.m.,

in her lime-green thong); Jonathan Safran Foer's *Grandmother* offers cookies to sweeten the tale of her heart scan; and Dave Eggers, George Saunders, David Mitchell, Colm Tóibín, A.M. Homes, Chris Ware and many more each have someone to introduce to you, too. With an introduction by Zadie Smith and brand-new stories from over twenty of the best writers of their generation from both sides of the Atlantic, *The Book of Other People* is as dazzling and inventive as its authors, and as vivid and wide-ranging as its characters.

The People and the Books

An accessible introduction to the classics of Jewish literature, from the Bible to modern times, by "one of America's finest literary critics" (Wall Street Journal). Jews have long embraced their identity as "the people of the book." But outside of the Bible, much of the Jewish literary tradition remains little known to nonspecialist readers. *The People and the Books* shows how central questions and themes of our history and culture are reflected in the Jewish literary canon: the nature of God, the right way to understand the Bible, the relationship of the Jews to their Promised Land, and the challenges of living as a minority in Diaspora. Adam Kirsch explores eighteen classic texts, including the biblical books of Deuteronomy and Esther, the philosophy of Maimonides, the autobiography of the medieval businesswoman Glückel of Hameln, and the Zionist manifestoes of Theodor Herzl. From the Jews of Roman Egypt to the mystical devotees of Hasidism in Eastern Europe, *The People and the Books* brings the treasures of Jewish literature to life and offers new ways to think about their enduring power and influence.

News for All the People: The Epic Story of Race and the American Media

A landmark narrative history of American media that puts race at the center of the story. Here is a new, sweeping narrative history of American news media that puts race at the center of the story. From the earliest colonial newspapers to the Internet age, America's racial divisions have played a central role in the creation of the country's media system, just as the media has contributed to—and every so often, combated—racial oppression. *News for All the People* reveals how racial segregation distorted the information Americans received from the mainstream media. It unearths numerous examples of how publishers and broadcasters actually fomented racial violence and discrimination through their coverage. And it chronicles the influence federal media policies exerted in such conflicts. It depicts the struggle of Black, Latino, Asian, and Native American journalists who fought to create a vibrant yet little-known alternative, democratic press, and then, beginning in the 1970s, forced open the doors of the major media companies. The writing is fast-paced, story-driven, and replete with memorable portraits of individual journalists and media executives, both famous and obscure, heroes and villains. It weaves back and forth between the corporate and government leaders who built our segregated media system—such as Herbert Hoover, whose Federal Radio Commission eagerly awarded a license to a notorious Ku Klux Klan organization in the nation's capital—and those who rebelled against that system, like Pittsburgh Courier publisher Robert L. Vann, who led a remarkable national campaign to get the black-face comedy *Amos 'n' Andy* off the air. Based on years of original archival research and up-to-the-minute reporting and written by two veteran journalists and leading advocates for a more inclusive and democratic media system, *News for All the People* should become the standard history of American media.

Anxious People

Instant #1 New York Times Bestseller A People Book of the Week, Book of the Month Club selection, and Best of Fall in Good Housekeeping, PopSugar, The Washington Post, New York Post, Shondaland, CNN, and more! "[A] quirky, big-hearted novel... Wry, wise, and often laugh-out-loud funny, it's a wholly original story that delivers pure pleasure." —People From the #1 New York Times bestselling author of *A Man Called Ove* comes a charming, poignant novel about a crime that never took place, a would-be bank robber who disappears into thin air, and eight extremely anxious strangers who find they have more in common than they ever imagined. Looking at real estate isn't usually a life-or-death situation, but an apartment open house becomes just that when a failed bank robber bursts in and takes a group of strangers hostage. The captives

include a recently retired couple who relentlessly hunt down fixer-uppers to avoid the painful truth that they can't fix their own marriage. There's a wealthy bank director who has been too busy to care about anyone else and a young couple who are about to have their first child but can't seem to agree on anything, from where they want to live to how they met in the first place. Add to the mix an eighty-seven-year-old woman who has lived long enough not to be afraid of someone waving a gun in her face, a flustered but still-ready-to-make-a-deal real estate agent, and a mystery man who has locked himself in the apartment's only bathroom, and you've got the worst group of hostages in the world. Each of them carries a lifetime of grievances, hurts, secrets, and passions that are ready to boil over. None of them is entirely who they appear to be. And all of them—the bank robber included—desperately crave some sort of rescue. As the authorities and the media surround the premises these reluctant allies will reveal surprising truths about themselves and set in motion a chain of events so unexpected that even they can hardly explain what happens next. Rich with Fredrik Backman's "pitch-perfect dialogue and an unparalleled understanding of human nature" (Shelf Awareness), *Anxious People* is an ingeniously constructed story about the enduring power of friendship, forgiveness, and hope—the things that save us, even in the most anxious times.

CRISPR People

What does the birth of babies whose embryos had gone through genome editing mean—for science and for all of us? In November 2018, the world was shocked to learn that two babies had been born in China with DNA edited while they were embryos—as dramatic a development in genetics as the 1996 cloning of Dolly the sheep. In this book, Hank Greely, a leading authority on law and genetics, tells the fascinating story of this human experiment and its consequences. Greely explains what Chinese scientist He Jiankui did, how he did it, and how the public and other scientists learned about and reacted to this unprecedented genetic intervention. The two babies, nonidentical twin girls, were the first “CRISPR'd” people ever born (CRISPR, Clustered Regularly Interspaced Short Palindromic Repeats, is a powerful gene-editing method). Greely not only describes He's experiment and its public rollout (aided by a public relations adviser) but also considers, in a balanced and thoughtful way, the lessons to be drawn both from these CRISPR'd babies and, more broadly, from this kind of human DNA editing—“germline editing” that can be passed on from one generation to the next. Greely doesn't mince words, describing He's experiment as grossly reckless, irresponsible, immoral, and illegal. Although he sees no inherent or unmanageable barriers to human germline editing, he also sees very few good uses for it—other, less risky, technologies can achieve the same benefits. We should consider the implications carefully before we proceed.

People of the Book

We live in a world polarized by the ongoing conflict between Muslims, Christians and Jews, but - in an extraordinary narrative spanning fourteen centuries - Zachary Karabell argues that the relationship between Islam and the West has never been simply one of animosity and competition, but has also comprised long periods of cooperation and coexistence. Through a rich tapestry of stories and a compelling cast of characters, *People of the Book* uncovers known history, and forgotten history, as Karabell takes the reader on an extraordinary journey through the Arab and Ottoman empires, the Crusades and the Catholic Reconquista and into the modern era, as he examines the vibrant examples of discord and concord that have existed between these monotheistic faiths. By historical standards, today's fissure between Islam and the West is not exceptional, but because of weapons of mass destruction, that fissure has the potential to undo us more than ever before. This is reason enough to look back and remember that Christians, Jews and Muslims have lived constructively with one another. They have fought and taught each other, and they have learned from one another. Retrieving this forgotten history is a vital ingredient to a more stable, secure world.

Internet for the People

"For all the informational convenience the internet offers, it is deeply flawed. How can it be improved? Writer Ben Tarnoff proposes one possibility in this intriguing book, which urges the development of 'a public

lane on the information superhighway.' It's worth checking out for yourself.\" – Seth MacFarlane Why is the internet so broken, and what could ever possibly fix it? In *Internet for the People*, leading tech writer Ben Tarnoff offers an answer. The internet is broken, he argues, because it is owned by private firms and run for profit. Google annihilates your privacy and Facebook amplifies right-wing propaganda because it is profitable to do so. But the internet wasn't always like this—it had to be remade for the purposes of profit maximization, through a years-long process of privatization that turned a small research network into a powerhouse of global capitalism. Tarnoff tells the story of the privatization that made the modern internet, and which set in motion the crises that consume it today. The solution to those crises is straightforward: deprivatize the internet. Deprivatization aims at creating an internet where people, and not profit, rule. It calls for shrinking the space of the market and diminishing the power of the profit motive. It calls for abolishing the walled gardens of Google, Facebook, and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives that encode real democratic control. To build a better internet, we need to change how it is owned and organized. Not with an eye towards making markets work better, but towards making them less dominant. Not in order to create a more competitive or more rule-bound version of privatization, but to overturn it. Otherwise, a small number of executives and investors will continue to make choices on everyone's behalf, and these choices will remain tightly bound by the demands of the market. It's time to demand an internet by, and for, the people now.

People Like Us

The inspiring story of political newcomers (sometimes also newcomers to America) who are knocking down built-in barriers to creating better government. The system is rigged: America's political leadership remains overwhelmingly white, male, moneyed, and Christian. Even at the local and state levels, elected office is inaccessible to the people it aims to represent. But in *People Like Us*, political scientist Sayu Bhojwani shares the stories of a diverse and persevering range of local and state politicians from across the country who are challenging the status quo, winning against all odds, and leaving a path for others to follow in their wake. In Anaheim, California, a previously undocumented Mexican American challenges the high-powered interests of the Disney Corporation to win a city council seat. In the Midwest, a thirty-something Muslim Somali American unseats a forty-four-year incumbent in the Minnesota house of representatives. These are some of the foreign-born, lower-income, and of-color Americans who have successfully taken on leadership roles in elected office despite xenophobia, political gatekeeping, and personal financial concerns. In accessible prose, Bhojwani shines a light on the political, systemic, and cultural roadblocks that prevent government from effectively representing a rapidly changing America, and offers forward-thinking solutions on how to get rid of them. *People Like Us* serves as a road map for the burgeoning democracy that has been a long time in the making: inclusive, multiracial, and unstoppable.

Famous People

This fresh, smart novel in the guise of a celebrity memoir probes the inner life of a mega-famous pop star. Honestly, what amazes me the most with a lot of the people I meet is that they think they're so big. They think, ultimately, that the universe revolves around them. And I'm beginning to think that it's only when you live a life like mine—it's only when you're in a position where you don't even really own yourself, when you can't even really say that you're a citizen of any particular country—that you realize that we're all just tiny pieces of cosmic dust floating through the void until we disappear forever and we're never heard from again. So begins the life story of our uber famous twenty-two year old narrator. A teen idol since he was twelve, when a video of him singing went viral, his star has only risen since. Now, haunted by the suicide of his manager-father, unsettled by the very different paths he and his teenage love (and girl pop-star counterpart) "Mandy" have taken, and increasingly aware that he has signed on to something he has little control over, he begins to parse the divide that separates him from the "normal people" of the world. Sneakily philosophical, earnest and funny, Justin Kuritzkes's *Famous People* is a rollicking, unforgettable look at the clash between fame and the human condition.

For the People

For the People offers a new interpretation of populist political movements from the Revolution to the eve of the Civil War and roots them in the disconnect between the theory of rule by the people and the reality of rule by elected representatives. Ron Formisano seeks to rescue populist movements from the distortions of contemporary opponents as well as the misunderstandings of later historians. From the Anti-Federalists to the Know-Nothings, Formisano traces the movements chronologically, contextualizing them and demonstrating the progression of ideas and movements. Although American populist movements have typically been categorized as either progressive or reactionary, left-leaning or right-leaning, Formisano argues that most populist movements exhibit liberal and illiberal tendencies simultaneously. Gendered notions of "manhood" are an enduring feature, yet women have been intimately involved in nearly every populist insurgency. By considering these movements together, Formisano identifies commonalities that belie the pattern of historical polarization and bring populist movements from the margins to the core of American history.

Running. Because Fran knows what really happened to Gabe's daughter. She knows who is responsible. And she knows what they will do if they ever catch up to her and Alice. Listening to People

A down-to-earth, practical guide for interview and participant observation and analysis. In-depth interviews and close observation are essential to the work of social scientists, but inserting one's researcher-self into the lives of others can be daunting, especially early on. Esteemed sociologist Annette Lareau is here to help. Lareau's clear, insightful, and personal guide is not your average methods text. It promises to reduce researcher anxiety while illuminating the best methods for first-rate research practice. As the title of this book suggests, Lareau considers listening to be the core element of interviewing and observation. A researcher must listen to people as she collects data, listen to feedback as she describes what she is learning, listen to the findings of others as they delve into the existing literature on topics, and listen to herself in order to sift and prioritize some aspects of the study over others. By listening in these different ways, researchers will discover connections, reconsider assumptions, catch mistakes, develop and assess new ideas, weigh priorities, ponder new directions, and undertake numerous adjustments—all of which will make their contributions clearer and more valuable. Accessibly written and full of practical, easy-to-follow guidance, this book will help both novice and experienced researchers to do their very best work. Qualitative research is an inherently uncertain project, but with Lareau's help, you can alleviate anxiety and focus on success.

The People's Network

The Bell System dominated telecommunications in the United States and Canada for most of the twentieth century, but its monopoly was not inevitable. In the decades around 1900, ordinary citizens—farmers, doctors, small-town entrepreneurs—established tens of thousands of independent telephone systems,

stringing their own wires to bring this new technology to the people. Managed by opportunists and idealists alike, these small businesses were motivated not only by profit but also by the promise of open communication as a weapon against monopoly capital and for protection of regional autonomy. As the Bell empire grew, independents fought fiercely to retain control of their local networks and companies—a struggle with an emerging corporate giant that has been almost entirely forgotten. The People's Network reconstructs the story of the telephone's contentious beginnings, exploring the interplay of political economy, business strategy, and social practice in the creation of modern North American telecommunications. Drawing from government documents in the United States and Canada, independent telephone journals and publications, and the archives of regional Bell operating companies and their rivals, Robert MacDougall locates the national debates over the meaning, use, and organization of the telephone industry as a turning point in the history of information networks. The competing businesses represented dueling political philosophies: regional versus national identity and local versus centralized power. Although independent telephone companies did not win their fight with big business, they fundamentally changed the way telecommunications were conceived.

People of the Book

The Christians that lived around the Arabian Peninsula during Muhammad's lifetime are shrouded in mystery. Some of the stories of the Prophet's interactions with them are based on legends and myths, while others are more authentic and plausible. But who exactly were these Christians? Why did Muhammad interact with them as he reportedly did? And what lessons can today's Christians and Muslims learn from these encounters? Scholar Craig Considine, one of the most powerful global voices speaking in admiration of the prophet of Islam, provides answers to these questions. Through a careful study of works by historians and theologians, he highlights an idea central to Muhammad's vision: an inclusive Ummah, or Muslim nation, rooted in citizenship rights, interfaith dialogue, and freedom of conscience, religion and speech. In this unprecedented sociological analysis of one of history's most influential human beings, Considine offers groundbreaking insight that could redefine Christian and Muslim relations.

People's Diplomacy of Vietnam

This is the first full-length book on the concept of "People's Diplomacy," promoted by the president of North Vietnam, Ho Chi Minh, at the peak of the Vietnam War from 1965-1972. It holds great appeal for historians, international relations scholars, diplomats, and the general reader interested in Vietnam. A form of informal diplomacy, people's diplomacy was carried out by ordinary Vietnamese including writers, cartoonists, workers, women, students, filmmakers, medical doctors, academics, and sportspersons. They created an awareness of the American bombardment of innocent Vietnamese civilians, and made profound connections with the anti-war movements abroad. People's diplomacy made it difficult for the United States to prolong the war because the North Vietnamese, together with the peace movements abroad, exerted popular pressure on the American presidents Lyndon Johnson and Richard Nixon to end the conflict. It was much more effective than the formal North Vietnamese diplomacy in gaining the support of Westerners who were averse to communism. It damaged the reputation of the United States by casting North Vietnam as a victim of American imperialism.

A People's Contest, Vol I

The American Civil War is the most written-about war human beings have yet fought. And yet, its controversies are still being argued over: Was it about slavery or States' rights? Did the South ever have a chance to win? And above all, how did it become such a desperate struggle, claiming the lives of more Americans than any other conflict? The story of the Civil War has become still more relevant in recent times, as the nation still grapples with the cultural divide between city and rural, North and South, and the unfinished struggle for the rights of minorities. \"A People's Contest\" takes a different approach than the classical histories, using a day-by-day account which illuminates how decisions were made and how the momentous events unfolded. And the people who were part of it, politicians, generals, soldiers, and private citizens, give their voices to the story.
