Storytelling In Daily Life

Storytelling is perhaps the most common way people make sense of their experiences, claim identities, and "get a life." So much of our daily life consists of writing or telling our stories and listening to and reading the stories of others. But we rarely stop to ask: what are these stories? How do they shape our lives? And why do they matter? The authors ably guide readers through the complex world of performing narrative. Along the way they show the embodied contexts of storytelling, the material constraints on narrative performances, and the myriad ways storytelling orders information and tasks, constitutes meanings, and positions speaking subjects. Readers will also learn that narrative performance is consequential as well as pervasive, as storytelling opens up experience and identities to legitimization and critique. The authors' multi-leveled model of strategy and tactics considers how relations of power in a system are produced, reproduced, and altered in performing narrative. The authors explain this strategic model through an extended discussion of family storytelling, using Franco Americans in Maine as their exemplar. They explore what stories families tell, how they tell them, and how storytelling creates family identities. Then, they show the range and reach of this strategic model by examining storytelling in diverse contexts: a breast cancer narrative, a weblog on the Internet, and an autobiographical performance on the public stage. Readers are left with a clear understanding of how and why the performance of narrative is the primary communicative practice shaping our lives today.

Storytelling

Politics is no longer the art of the possible, but of the fictive. Its aim is not to change the world as it exists, but to affect the way that it is perceived. In *Storytelling* Christian Salmon looks at the twenty-first century hijacking of creative imagination, anatomizing the timeless human desire for narrative form, and how this desire is abused by the marketing mechanisms that bolster politicians and their products: luxury brands trade on embellished histories, managers tell stories to motivate employees, soldiers in Iraq train on Hollywood-conceived computer games, and spin doctors construct political lives as if they were a folk epic. This "storytelling machine" is masterfully unveiled by Salmon, and is shown to be more effective and insidious as a means of oppression than anything dreamed up by Orwell.

Storytelling for Lawyers

Good lawyers have an ability to tell stories. Whether they are arguing a murder case or a complex financial securities case, they can capably explain a chain of events to judges and juries so that they understand them. The best lawyers are also able to construct narratives that have an emotional impact on their intended audiences. But what is a narrative, and how can lawyers go about constructing one? How does one transform a cold presentation of facts into a seamless story that clearly and compellingly takes readers not only from point A to point B, but to points C, D, E, F, and G as well? In *Storytelling for Lawyers*, Phil Meyer explains how. He begins with a pragmatic theory of the narrative foundations of litigation practice and then applies it to a range of practical illustrative examples: briefs, judicial opinions and oral arguments. Intended for legal practitioners, teachers, law students, and even interdisciplinary academics, the book offers a basic yet comprehensive explanation of the central role of narrative in litigation. The book also offers a narrative tool kit that supplements the analytical skills traditionally emphasized in law school as well as practical tips for practicing attorneys that will help them craft their own legal stories.

Sketching from the Imagination: Storytelling

The first steps in storytelling are often easy, because we tell stories informally every day. Once you take storytelling into the more formal contexts of performance or occupational uses, however, you may be faced with challenges you hadn't anticipated. You need information that goes beyond the basics. And you need it in a form that does not just tell you what to do but helps you make your own informed decisions. This book is meant for the reader who has already begun to tell stories and is ready to learn more about the art. Instead of rules to follow, it gives you a series of frameworks that encourage you to think on your feet. Doug Lipman has written and taught extensively on the art of storytelling. With the same generosity and warmth that characterize his workshops, he considers the teller's relationship to the story, the teller's relationship to the audience, and the transfer of imagery in a medium that is simultaneously visual, auditory, and kinesthetic.

Storytelling in Design

This textbook offers a practical guide to creating narratives in audio media. It is one of the most beautiful and complex tasks in radio and podcasting: how do you tell a compelling story and keep your listeners tuned in? In *Storytelling in Radio and Podcasts*, Preger offers practical answers to crucial questions: What material is suitable for long stories? How can I bind listeners to a real story for 15, 30 or 60 minutes? Or even get them excited about a whole series? How do I maintain suspense from beginning to end? How do I find my narrative voice? And, how do I develop a sound design for complex narratives? Richly illustrated using practical examples, the book guides the reader through various stages of developing a non-fiction narrative and examines structure, character development, suspense, narration, sound-design and ethics.

Digital Storytelling

Storytelling has proliferated today, from TED Talks and Humans of New York to a plethora of story-coaching agencies and consultants. Heartbreaking accounts of poverty, mistreatment, and struggle may move us deeply. But what do they move us to do? And what are the stakes in the crafting and use of storytelling? In *Curated Stories*, Sujatha Fernandes considers the rise of storytelling alongside the broader shift to neoliberal, free-market economies. She argues that stories have been reconfigured to promote entrepreneurial self-making and restructured as easily digestible soundbites mobilized toward utilitarian ends. Fernandes roams the globe and returns with stories from the Afghan Women's Writing Project, the domestic workers movement and the undocumented student Dreamer movement in the United States, and the Misión Cultura project in Venezuela. She shows how the conditions under which certain stories are told, the tropes through which they are narrated, and the ways in which they are responded to may actually disguise the deeper contexts of global inequality. Curated stories shift the focus away from structural problems and defuse the confrontational politics of social movements. Not just a critical examination of the contemporary use of narrative and its wider impact on our collective understanding of pressing social issues, *Curated Stories* also explores how storytelling might be reclaimed to allow for the complexity of experience to be expressed in pursuit of transformative social change.

Storytelling in Radio and Podcasts

Once upon a time the practice of storytelling was about collecting interesting stories about the past, and converting them into soundbite pitches. Now it is more about foretelling the ways the future is approaching the present, prompting a re-storying of the past. Storytelling has progressed and is about a diversity of voices, not just one teller of one past; it is how a group or organization of people negotiates the telling of history and the telling of what future is arriving in the present. With the changes in storytelling practices and theory there is a growing need to look at new and different methodologies. Within this exciting new book, David M. Boje develops new ways to ask questions in interviews and make observations of practice that are about storytelling the future. This, after all, is where management practice concentrates its storytelling, while much of the theory and method work is all about how the past might recur in the future. *Storytelling Organizational Practices* takes the reader on a journey: from looking at narratives of past experience through looking at living stories of emergence in the present to looking at how the future is arriving in ways that prompts a re-storying of the past.

Curated Stories

Hannah Arendt argued that the “political” is best understood as a power relation between private and public realms, and that storytelling is a vital bridge between these realms—a site where individualized passions and shared perspectives are contested and interwoven. Jackson explores and expands Arendt’s ideas through a cross-cultural analysis of storytelling that includes Kuranko stories from Sierra Leone, Aboriginal stories of the stolen generation, stories recounted before the South African Truth and Reconciliation Commission, and stories of refugees, renegades, and war veterans. Focusing on the violent and volatile conditions under which stories are and are not told, and exploring the various ways in which narrative reworkings of reality enable people to symbolically alter subject-object relations, Jackson shows how storytelling may restore existential viability to the intersubjective fields of self and other, self and state, self and situation.

Storytelling Organizational Practices

Transmedia storytelling is defined as a process where integral elements of fiction get dispersed systematically across multiple delivery channels to create a unified and coordinated entertainment experience. This process and its narrative models have had an increasing influence on the academic world in addressing both theoretical and practical dimensions of transmedia storytelling. *The Handbook of Research on Transmedia Storytelling and Narrative Strategies* is a critical scholarly resource that explores the connections between consumers of media content and information parts that come from multimedia platforms, as well as the concepts of narration and narrative styles. Featuring coverage on a wide range of topics such as augmented reality, digital society, and marketing strategies, this book explores narration as a method of relating to consumers. This book is ideal for advertising professionals, creative directors, academicians, scriptwriters, researchers, and upper-level graduate students seeking current research on narrative marketing strategies.

The Politics of Storytelling

Storytelling in organizations is a notion that encompasses both the stories that the organization produces and the ones told by its members. It provides both an in-depth treatment of the literature on narratives, stories and storytelling and an extensive empirical case from an American banking institution.

Handbook of Research on Transmedia Storytelling and Narrative Strategies

Storytelling can be a lifelong and life sustaining habit of mind, a personal inheritance that connects us to our communities. It can also serve as an organizational inheritance—a management tool that helps businesses to develop and thrive. For more than a decade, award-winning author Janis Forman has been helping executives to tell stories in service of their organizational objectives. In *Storytelling in Business: The Authentic and*

Fluent Organization, she teaches readers everywhere how the craft of storytelling can help them to achieve their professional goals. Focusing on the role of storytelling at the enterprise level, this book provides a research-driven framework for engaging in organizational storytelling. Forman presents original cases from Chevron, FedEx, Phillips, and Schering-Plough. Organizations like those featured in the book can make use of storytelling for good purposes, such as making sense of their strategy, communicating it, and developing or strengthening culture and brand. These uses of storytelling generate positive consequences that can have a sustained and significant impact on an organization. While large firms employ teams of digital and communication professionals, there's much that any of us can extrapolate from their experience to create stories to further our own objectives. To show the reach of storytelling, Forman conducted 140 interviews with professionals ranging from CEOs in small and thriving firms, to corporate communication and digital media experts, to filmmakers—arguably the world experts in visual storytelling. She draws out specific lessons learned, and shows how to employ the road-tested strategies demonstrated by these leaders. Although this book focuses on storytelling in the context of business, Forman takes inspiration from narratives in literature and film, philosophical and social thought, and relevant concepts from a variety of other disciplines to instruct the reader on how to develop truly authentic and meaningful tales to drive success. A final chapter brings readers back to square one: the development of their own "signature story." This book is a pioneering work that guides us beyond the pressure and noise of daily organizational life to influence people in a sustained, powerful way. It teaches us to be fluent storytellers who succeed by mastering this vital skill.
