Beloved Dog

Maira Kalman, with wit and great sensitivity, reveals why dogs bring out the best in us Maira Kalman + Dogs = Bliss Dogs have lessons for us all. In *Beloved Dog*, renowned artist and author Maira Kalman illuminates our cherished companions as only she can. From the dogs lovingly illustrated in her acclaimed children's books to the real-life pets who inspire her still, Kalman's *Beloved Dog* is joyful, beautifully illustrated, and, as always, deeply philosophical. Here is Max Stravinsky, the dog poet of Oh-La-La (Max in Love)-fame, and her own Irish Wheaton Pete (almost named Einstein, until he revealed himself to be "clearly no Einstein"), who also made an appearance in the delightful *What Pete Ate: From A to Z*. And of course, there is Boganch, Kalman's in-laws' "big black slobbering Hungarian Beast." And that's just the beginning. With humor and intelligence, Kalman gives voice to the dogs she adores, noting that they are constant reminders that life reveals the best of itself when we live fully in the moment and extend unconditional love. "And it is very true," she writes, "that the most tender, complicated, most generous part of our being blossoms without any effort, when it comes to the love of a dog."

Inside of a Dog

As an unabashed dog lover, Alexandra Horowitz is naturally curious about what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpernickel, allowed her to understand her dog better, and appreciate her more through that understanding. The reader will be able to do the same with their own dog. This is not another dog training book. Instead, *Inside of a Dog* will allow dog owners to

look at their pets' behaviour in a different, and revealing light, enabling them to understand their dogs and enjoy their relationship even more.

What Is a Dog?

\"Exploring the natural history of these creatures, the Coppingers explain how the village dogs of Vietnam,

India, Africa, and Mexico are strikingly similar. These feral dogs, argue the Coppingers, are in fact the real representative dogs, nearly uniform in size and shape and incredibly self-sufficient. Drawing on nearly five decades of research, they show how dogs actually domesticated themselves in order to become such sufficient scavengers of human refuse. The Coppingers also examine the behavioral characteristics that enable dogs to live successfully and to reproduce, unconstrained by humans, in environments that we ordinarily do not think of as dog- friendly.\"--From publisher description.

The Forever Dog

THE INSTANT #1 INTERNATIONAL BESTSELLER In this path-breaking guide, two of the world's most popular and trusted pet-care advocates reveal how to delay aging and provide a long, happy, healthy life for our canine companions Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans—cancer, obesity, diabetes, organ degeneration and autoimmune disorders—also beset canines. As a result, our beloved companions struggle with preventable health problems throughout much of their lives. Because dogs can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices on their behalf. Rodney Habib and Karen Becker, DVM, travelled the world collecting wisdom from top geneticists, microbiologists and longevity researchers. They also interviewed people whose dogs have lived into their twenties and even thirties. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice and inspiring stories about dogs and the people who love them. The Forever Dog prescriptive plan can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including details commercial manufacturers don't want us to know—and offer recipes, tips and easy solutions for ensuring our dogs obtain the nutrients they need. They also explore how external factors that we often overlook can greatly affect a dog's overall health and well-being—including the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel “up the leash.” This definitive dog-care guide empowers us with the knowledge we need to make wise choices and keep our dogs healthy and happy for years to come.

Afro-Dog

The animal-rights organization PETA asked “Are Animals the New Slaves?” in a controversial 2005 fundraising campaign; that same year, after the Humane Society rescued pets in the aftermath of Hurricane Katrina while black residents were neglected, some declared that white America cares more about pets than black people. These are but two recent examples of a centuries-long history in which black life has been pitted against animal life. Does comparing human and animal suffering trivialize black pain, or might the intersections of racialization and animalization shed light on interlinked forms of oppression? In Afro-Dog, Bénédicte Boisseron investigates the relationship between race and the animal in the history and culture of the Americas and the black Atlantic, exposing a hegemonic system that compulsively links and opposes

blackness and animality to measure the value of life. She analyzes the association between black civil disobedience and canine repression, a history that spans the era of slavery through the use of police dogs against protesters during the civil rights movement of the 1960s to today in places like Ferguson, Missouri. She also traces the lineage of blackness and the animal in Caribbean literature and struggles over minorities' right to pet ownership alongside nuanced readings of Derrida and other French theorists. Drawing on recent debates on black lives and animal welfare, Afro-Dog reframes the fast-growing interest in human–animal relationships by positioning blackness as a focus of animal inquiry, opening new possibilities for animal studies and black studies to think side by side.

The Curious Incident of the Dog in the Night-Time

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.
