On a Very Rare Silver Coin (Denaro D'Argento) of Berengarius II., King of Italy, with His Son Albertus, as Co-regent

A valuable collection of up-to-date information by leading international experts The history of rotator cuff tendinopathy started more than 150 years ago, when some types of shoulder pain were attributed to rupture of the rotator cuff tendon'. In the third millennium, the pathogenetic mechanisms leading to rotator cuff problems are still debated. Although conservative measures are the first-line therapy, poor spontaneous tendon healing and progression from partial- thickness to full-thickness tears may mandate surgery. Biological, biomechanical and clinical studies have been conducted to establish the superiority of one technique over the other, but no clinical differences have been found. Although we know more about the pathogenesis, diagnosis and management of rotator cuff pathology, our efforts should be directed at trying to find the treatment that best fits the specific needs of each patient. This book collects current reviews on rotator cuff problems, with regard to both biological and clinical aspects, and provides practical hints on management and rehabilitation for sports physicians, surgeons, physiotherapists and athletic trainers.

Denaro

Professor Vincenzo Denaro has been an active member of the Institute of Clinical Orthopedics and Traumatology of the University of Catania since 1986. It has been my pleasure, as Director, to be associated with Professor Denaro, first as a Sessional Consultant in diseases of the spine and finally, after his promotion to the permanent staff, as Associate Professor. Professor Denaro began his postgraduate program of specialization, and hence his career, in the Orthopedic Clinic of the University of Pavia under the tutorship of Professor Mario Boni. It was the latter who directed and guided his development in studying the disease processes of the vertebral column. In his pursuit of knowledge, he undertook additional studies in foreign clinics, including the Wellesley Hospital at the University of Toronto with Professor I. MacNab and Professor V. Fornasier. He spent a full year at the Orthopedic Clinic of the University of Paris under the guidance of Professor Roy Camille. He derived great benefit from the clinical experience gained there and became acquainted with advanced and specialized surgical techniques specific to his field of interest. More recently, since accepting his current appointment, he has been able to put into practice the expertise developed over 20 years of study and research. Not only does he have extensive personal clinical experience, but he very wisely undertook to maintain a thorough, complete, and accurate record of the experience gathered from his case load.

La psicologia del denaro

First published in 1202, Fibonacci's *Liber Abaci* was one of the most important books on mathematics in the Middle Ages, introducing Arabic numerals and methods throughout Europe. This is the first translation into a modern European language, of interest not only to historians of science but also to all mathematicians and mathematics teachers interested in the origins of their methods.

The 70th volume of the Eranos Yearbooks presents the work of the last three years of activities at the Eranos Foundation (2009–2011). It includes the papers given on the theme of the 2011 conference, *About Fragility in the Contemporary World*, together with talks given on the occasion of the seminar cycle entitled, *Eranos Jung Lectures*, which took place during the years 2010–2011 to commemorate the 50th anniversary of Carl

Gustav Jung's passing. Eminent international scholars gathered to share their work, presented here primarily in English, along with some chapters in Italian. This publication carries additional special meaning in further consolidating the collaboration with the Fetzer Institute by presenting the manuscripts of the Dialogues on the Power of Love, held at Eranos between 2008 and 2011. This project follows the path of the original model of Eranos, especially the aspect of dialogue, searching for understanding and deepening crucial themes in the contemporary world. Contents: 2011 Eranos Conference: About Fragility in the Contemporary World 2008–2011 Fetzer Institute Dialogues at Eranos – The Power of Love: - Love in the Esoteric Traditions - Love in the History of Eranos - Love and Beauty in the Visual Arts - Love and the Social Bond - Love and the Musical Arts 2010–2011 Eranos-Jung Lectures The Greek word 'Eranos' means a 'banquet', to which every guest contributes. From 1933 onwards, the Eranos Conferences took shape in Ascona-Moscia (Switzerland), springing from the idea of Olga Fröbe-Kapteyn to create a 'Meeting Place of East and West'. Under the influence of the psychologist Carl Gustav Jung and other prominent leaders of that era, the Eranos Conferences found their way towards symbolical, archetypal, and mythological motifs. The Eranos gathering is symbolized by its famous Round Table, the image and meaning of which inspired many of the leading thinkers of the 20th century. For more than 70 years, depth psychologists, philosophers, theologians, orientalist, historians of religions as well as natural scientists find at Eranos a unique place where they could meet and exchange views. The rich collection of Eranos Yearbooks bears testimony to an immense and original work accomplished in various fields of learning.

Decisions and Orders of the National Labor Relations Board

Organized crime is perhaps the most fascinating phenomenon of our time. From Al Capone, who boldly claimed his bootlegging activities were a public service, to the flamboyant Teflon Don, the criminals of the underworld have garnered headlines and captured our imagination with their violent and extravagant lifestyles. Mafia Crimes is an absorbing introduction to the mob's most influential personalities - their lives, loves and terrible crimes. It also provides an in-depth history of the role of the Mob in Sicily and America. For anyone who wants to know the truth about organized crime and understand the violent forces that have shaped it over the last century, this book is an indispensable guide.

Educare al denaro

Il professore William Sparrow, una sera, mentre sta attraversando, con la propria bicicletta il bosco di Guilford per andare a casa ode un grido. Incuriosito si dirige verso quel grido e scopre così il cadavere di un uomo che è stato appena strangolato. Senza perdere tempo corre al villaggio e avverte sia la polizia che il medico condotto: il dottore Dick Henshaw. Una sorpresa li attende nel bosco: il cadavere dello strangolato è scomparso. Sia la polizia che il dottor Henshaw si chiedono se il professore Sparrow non abbia bevuto o se non soffra di allucinazioni, ma il ritrovamento di alcune macchie di sangue e di una miniatura raffigurante una bellissima ragazza li fanno ricredere. Per il curioso dottor Henshaw si presentano molti quesiti da risolvere. Chi ha ucciso quell'uomo e perchè? Chi ha portato via il corpo durante l'assenza del professore e dove l'ha occultato? Che parte ha nella faccenda l'uomo di cui il professore ha udito i movimenti? Chi ha lasciato cadere la miniatura? Chi è la fanciulla del ritratto? Inoltre il delitto è avvenuto nella tenuta del Marchese de Cerennes, proprietario del Castello di Guildford. E per il dottor Henshaw è un rebus il perchè un francese si sia installato in un villaggio inglese così tranquillo e privo di attrattive. Inoltre il francese non esce mai di casa ed è sempre circondato da una quantità incredibile di stranieri. Un giallo serrato e pieno di ritmo e mistero.

Il denaro nella cultura moderna

Winner, 2010 Phyllis Goodhart Gordan Book Prize, the Renaissance Society of America 2009 Outstanding Academic Title, Choice Honorable Mention, Economics, 2009 PROSE Awards, Professional and Scholarly Publishing division of the Association of American Publishers Richard A. Goldthwaite, a leading economic historian of the Italian Renaissance, has spent his career studying the Florentine economy. In this magisterial work, Goldthwaite brings together a lifetime of research and insight on the subject, clarifying and explaining the complex workings of Florence's commercial, banking, and artisan sectors. Florence was one of the most industrialized cities in medieval Europe, thanks to its thriving textile industries. The importation of raw materials and the exportation of finished cloth necessitated the creation of commercial and banking practices that extended far beyond Florence's boundaries. Part I situates Florence within this wider international context and describes the commercial and banking networks through which the city's merchant-bankers operated. Part II focuses on the urban economy of Florence itself, including various industries, merchants, artisans, and investors. It also evaluates the role of government in the economy, the relationship of the urban economy to the region, and the distribution of wealth throughout the society. While political, social, and cultural histories of Florence abound, none focuses solely on the economic history of the city. The Economy of Renaissance Florence offers both a systematic description of the city's major economic activities and a comprehensive overview of its economic development from the late Middle Ages through the Renaissance to 1600.

A key resource for coaches, scientists and clinicians Sport is by its nature competitive and even during youth it is performed at different levels with elite young athletes at the top of the performance pyramid. A coordinated series of comprehensive, research-based reviews on factors underlying the performance of children and adolescents involved in competitive sport is presented in this volume. Leading exercise and sport scientists provide the latest information on the physiology of young elite athletes, the essential role of nutrition, and the effects of endurance, high-intensity and high-resistance training and overtraining as well as on the importance of laboratory and field-based monitoring of young athletes' performances. Further, thermoregulation and environmental factors that might affect performance are re-viewed. Finally, strategies for preventing sudden cardiac death and the diagnosis and management of common sport injuries in young athletes are discussed. The book provides up-to-date, evidence-based information for sports scientists, coaches, physiotherapists, pediatric sports medicine specialists, and other professionals involved in supporting elite young athletes.

Successo & denaro. Formazione e complessità sociale

The nexus between terrorism and organised crime consists of a strategic alliance between two non-state actors who are able to exploit illegal markets, threaten the security of individuals, and influence policy-making on a global level. Recent Europol reports have pointed towards the importance of studying the links between organised crime and terrorist groups, and have underlined that the nature and extent of these connections have seldom been addressed from an academic perspective. Considering the danger that both organised crime and terrorism currently pose to the world, the collusion between these two phenomena is of urgent contemporary interest. Basing itself on geographical case-studies, this book contributes to the existing literature in three ways: by enriching the empirical knowledge on the nature of the crime-terror nexus and its evolution; by exploring the impact of the nexus within different economic, political and societal contexts; and by expanding on its theoretical conceptualization. This book was originally published as a special issue of *Global Crime*.

The volume gathers together seventeen articles dedicated to the monetary history of medieval Italy, most of them newly translated into English. The articles in the first section of the volume trace the development of monetisation in Italy from the Lombard period until the rise of the communes, taking Rome, Lazio, Tuscany, and several cities and regions in north-central Italy as case studies. The articles in the second section analyse different aspects of monetary production and circulation in Byzantine Italy, while the third gathers together studies on various aspects of Carolingian coinage: the transition from the Lombard system and the problem of furnishing an adequate supply of silver; mints and royal administration; and the activity and inactivity of mints operating at the edges of the *Regnum Italiae*. All of the articles share the author's characteristic concern with setting the evidence from written sources against the wealth of new data emerging from recent archaeological research.

The Economy of Renaissance Florence

This volume brings together a series of studies by Professor Blomquist on the evolution of banking in Lucca from the 12th and 13th centuries. They describe how the leading bankers operated, how they invested, and how they pursued their family interests. In particular, they trace the transformation of money changers, or campsores, into deposit and transfer bankers, who deployed their capital in trading ventures as well as in banking. Moreover, the author shows how Lucchese merchant-bankers expanded their operations from Italy, first to the fairs of Champagne and ultimately to all of Europe's major commercial centres. Special attention is given to the use of the exchange contract, or cambium, as an instrument of credit and of transfer. Problems of coinage and foreign exchange are also treated extensively, including the origins of the Tuscan grossi and the Lucchese gold groat. The collection concludes with a study of the cloth trade and another concerning the first consuls in Lucca.

English Travellers and Italian Brigands a Narrative of Capture and Captivity by W.J.C. Moens

THE TRUE CRIME CULT CLASSIC: Follow journalist Maury Terry's decades-long investigation into the terrifying truth behind the murders of serial killer Son of Sam. Inspired the Netflix docuseries The Sons of Sam: A Descent into Darkness! On August 10, 1977, the NYPD arrested David Berkowitz for the Son of Sam murders that had terrorized New York City for over a year. Berkowitz confessed to shooting sixteen people and killing six with a .44 caliber Bulldog revolver, and the case was officially closed. Journalist Maury Terry was suspicious of Berkowitz's confession. Spurred by conflicting witness descriptions of the killer and clues overlooked in the investigation, Terry was convinced Berkowitz didn't act alone. Meticulously gathering evidence for a decade, he released his findings in the first edition of The Ultimate Evil. Based upon the evidence he had uncovered, Terry theorized that the Son of Sam attacks were masterminded by a Yonkers-based cult that was responsible for other ritual murders across the country. After Terry's death in 2015, documentary filmmaker Josh Zeman (Cropsey, The Killing Season, Murder Mountain) was given access to Terry's files, which form the basis of his docuseries with Netflix and a companion podcast. Taken together with The Ultimate Evil, which includes a new introduction by Zeman, these works reveal the stunning intersections of power, wealth, privilege, and evil in America—from the Summer of Sam until today.
