Database Programming With C

Object database

object-oriented programming. Object databases are different from relational databases which are table-oriented. A third type, object–relational databases, is a...

C (programming language)

C is a general-purpose programming language. It was created in the 1970s by Dennis Ritchie and remains widely used and influential. By design, C exposes...

C++

C++ (/?si? pl?s pl?s/, pronounced "C plus plus" and sometimes abbreviated as CPP or CXX) is a high-level, general-purpose programming language created...

Program database

Program database (PDB) is a file format (developed by Microsoft) for storing debugging information about a program (or, commonly, program modules such...

Object–relational database

store for software written in an object-oriented programming language, with an application programming interface API for storing and retrieving objects...

Objective-C

Objective-C is a high-level general-purpose, object-oriented programming language that adds Smalltalk-style message passing (messaging) to the C programming language...

C Sharp (programming language)

C# (/?si? ????rp/ see SHARP) is a general-purpose high-level programming language supporting multiple paradigms. C# encompasses static typing,: 4 strong...

Java (programming language)

its release, and has been a popular programming language since then. Java was the third most popular programming language in 2022[update] according to...

Database

hooks for database design, application programming, application program maintenance, database performance analysis and monitoring, database configuration...

C/AL

C/AL is a Database specific programming language, and is primarily used for retrieving, inserting and modifying records in a Navision database. C/AL...

JADE (programming language)

consists of the JADE programming language, Integrated development environment and debugger, integrated application server and object database management system...

Microsoft Access (category Desktop database application development tools)

with Book Shelf, Microsoft Access 2.0 was included with first sample databases "NorthWind Trader" which covered every possible aspect of programming a...

Berkeley DB (redirect from Berkeley Database License)

an embedded database software library for key/value data, historically significant in open-source software. Berkeley DB is written in C with API bindings...

Pro*C

Pro*C (also known as Pro*C/C++) is an embedded SQL programming language used by Oracle Database DBMSes. Pro*C uses either C or C++ as its host language...

Declarative programming

science, declarative programming is a programming paradigm—a style of building the structure and elements of computer programs—that expresses the logic...

Object-oriented programming

Object-oriented programming (OOP) is a programming paradigm based on the concept of objects. Objects can contain data (called fields, attributes or properties)...

Superbase (database)

20 years. It also has generally included a programming language to automate database-oriented tasks, and with later versions included WYSIWYG form and report...

General-purpose programming language

In computer software, a general-purpose programming language (GPL) is a programming language for building software in a wide variety of application domains...

Database abstraction layer

A database abstraction layer (DBAL or DAL) is an application programming interface which unifies the communication between a computer application and databases...

SQL (redirect from SQL database)

contained in a relational database. SQL is a set-based, declarative programming language, not an imperative programming language like C or BASIC. However, extensions...
