Some heroes aren't born... they're built. Westley Worthington has found the love of his life in Cordelia. But when he pushes her away to protect her family, he fears he's lost her forever. Cordelia Cross has never felt about anyone the way she feels about West. Which is exactly why she is resolved to keep her distance. When West is threatened with the loss of his fortune, his friends, and even his life, he must learn that it takes more than super-strength to be a hero to the ones he loves. Can he save the day one last time, before the technology that saved him finishes him for good? Find out in *Upgraded*, the final full-length novel in the Building a Hero trilogy from USA Today bestselling author Tasha Black.

Upgraded Chef: 12 Core Recipes to Supercharge Your Body & Brain

ABOUT THE BOOK This cookbook has been a decade in the making. As a bio hacker, I look at cooking as

one of the variables that leads to better personal performance. It's not just the quality of your food, it's how it's prepared. Being upgraded I take this stuff more personally than most people for good reason. This is the diet that helped me lose 100 lbs and keep it off since the late 90s. This is the diet that fixed - and upgraded - my brain function. It's the basis of the diet I created to help my wife Lana, a Karolinska-trained physician, restore her fertility so we could start a family at about age 40, after Lana was diagnosed with polycystic ovary syndrome (PCOS) by her OB-GYN, who said she'd likely be infertile. This is literally the diet that transformed my health, my family, my career, and my life. Bulletproofing yourself More than 100,000 people come to my blog every month to learn about how to eat to upgrade their bodies, their brains, and their lives. You can see their unsolicited testimonials on the site; people who lose 20 or more pounds in 6 weeks, without cutting calories. The guy who lost 75 pounds in 75 days. The physicians who use it in their practices. This recipe book isn't going to teach you everything you need to know about the Bulletproof Diet or even all the ways it works. You can find this info for free on Bulletproofexec.com where it can help the most people. Fuel your body with upgraded food This recipe book is going to teach you how to use safe, delicious cooking techniques to prepare meals that taste amazing, but also fuel your body and mind to levels of performance beyond what you probably believe you're capable of. We focus on three main types of cooking because they are the most versatile, flavorful, simple ways to create Bulletproof food. Bulletproof food is high in healthy fats (50-70% of calories), and avoids toxic foods and other toxins created by cooking. These small details can make all the difference in your health. They did for me. EXCERPTS FROM THE BOOK \"These 5 Indian spices make a popular spice mix known as Panch Poron. Make up a triple batch of the seed blend, it's lovely, you'll use it. Bring meats, fish, eggs to room temp before using, find out why on pages 53, 54 & 56.\" \"Bacon is an amazing food to cook with. The problem is that the quality of your bacon is very important. Average store quality bacon comes from animals fed an unsuitable diet, and the bacon is often cured in such a way that it contains more toxins that it should. Read more about \"bacon\" on page 51.\" Buy the book to read more!

Experimental Performance of the Regenerator for the Chrysler Upgraded Automotive Gas Turbine Engine

The aerodynamic performance of the inlet manifold and stator assembly of the compressor-drive turbine was experimentally determined with cold air as the working fluid. The investigation included measurements of mass flow and stator-exit fluid torque as well as radial surveys of total pressure and flow angle at the stator inlet and annulus surveys of total pressure and flow angle at the stator exit. The stator-exit aftermixed flow conditions and overall stator efficiency were obtained and compared with their design values and the experimental results from three other stators. In addition, an analysis was made to determine the constituent aerodynamic losses that made up the stator kinetic energy loss. (Author).

\"If McHugh is serious, she's anything but grim; with all her punning, bantering, and mock scolding of herself . . . she brightens the shadowy corners of her world with verbal pyrotechnics.\"—The New York Times Book Review \"Her poems are open, resilient, invisibly twisted: part safety net, part trampoline.\"—Voice Literary Supplement This fast-paced, verbally dexterous book—honored as a \"Book of the Year\" by Publishers Weekly—\"boils up and boils over\" as it utilizes medical terminology and iconography to work through loss and detachment. Heather McHugh's startling rhymes and rhythms, coupled with her sarcastic self-reflection and infectious laughter, serve as both palliative and prophylactic in the face of human sufferings and ignorance. Being \"upgraded to serious\" from critical condition is a nod to the healing powers of poetry. \"Not to Be Dwelled On\" Self-interest cropped up even there, the day I hoisted three instead of the ceremonially called-for two spadefuls of loam onto the coffin of my friend. Why shovel more than anybody else? What did I think I'd prove? More love (mud in her eye)? More will to work? (her father what, a shirker?) Christ, what wouldn't anybody give to get that gesture back? She cannot die again;

and I do nothing but re-live. Heather McHugh is the author of a dozen books of poetry and translation. She teaches at the University of Washington and Warren Wilson College and lives in Seattle, Washington.

NEW YORK TIMES BESTSELLER • “If Michael Crichton had written a superhero novel, it would look a lot like Upgrade.”—The New York Times Book Review “You don’t so much sympathize with the main character as live inside his skin.”—DIANA GABALDON, #1 New York Times bestselling author of the Outlander series “Mysterious, fascinating, and deeply moving—exploring the very nature of what it means to be human.”—ALEX MICHAELIDES, #1 New York Times bestselling author of The Silent Patient and The Maiden ONE OF THE BEST BOOKS OF THE YEAR: Time, She Reads The mind-blowing new thriller from the New York Times bestselling author of Dark Matter and Recursion—currently in development as a motion picture at Steven Spielberg's Amblin Partners “You are the next step in human evolution.” At first, Logan Ramsay isn’t sure if anything’s different. He just feels a little . . . sharper. Better able to concentrate. Better at multitasking. Reading a bit faster, memorizing better, needing less sleep. But before long, he can’t

deny it: Something's happening to his brain. To his body. He's starting to see the world, and those around him—even those he loves most—in whole new ways. The truth is, Logan's genome has been hacked. And there's a reason he's been targeted for this upgrade. A reason that goes back decades to the darkest part of his past, and a horrific family legacy. Worse still, what's happening to him is just the first step in a much larger plan, one that will inflict the same changes on humanity at large—at a terrifying cost. Because of his new abilities, Logan's the one person in the world capable of stopping what's been set in motion. But to have a chance at winning this war, he'll have to become something other than himself. Maybe even something other than human. And even as he's fighting, he can't help wondering: what if humanity's only hope for a future really does lie in engineering our own evolution? Intimate in scale yet epic in scope, Upgrade is an intricately plotted, lightning-fast tale that charts one man's thrilling transformation, even as it asks us to ponder the limits of our humanity—and our boundless potential.

This study was conducted in support of the Defense Civil Preparedness Agency's (DCPA) Crisis Relocation Planning (CRP) program in which existing structures will be upgraded to provide fallout shelters for a relocated population. A demonstration test was conducted in which a residential dwelling was upgraded by placing soil against the walls and on the roof of the structure. The shelter was large enough to house 80 people. Upgrading was accomplished partially by hand labor and machinery. The test showed that a conventional structure could be upgraded and that the shelter occupants using tools and materials found in most homes could if necessary upgrade their shelter during the expected 2- or 3-day period of crisis relocation preceding a nuclear attack.
