Food Anthropology in India

This book explores food in India and its evolution from prehistoric times to contemporary food trends while highlighting the intersections between culture, rituals, environment, and the economy with food, ingredients, and eating practices. It looks at the history of food and food preferences in India by studying historical, medicinal, and religious texts. The book analyses preferences and taboos from social, anthropological, cultural, political, and economic perspectives, mapping how food practices influence and are influenced by religion, production and distribution, ecology, and social class. It also examines consumption practices, problems with food production, agricultural distress, food and farming reforms, globalisation of food, the adoption of sustainable practices, and the future of farming, diets, and eating. Engaging and comprehensive, this book will be an essential read for scholars and researchers of anthropology, social and cultural anthropology, sociology, cultural studies, political studies, development studies, and food studies.

Complete Works of Swami Vivekananda

Published by Advaita Ashrama, a publication house of Ramakrishna Math, Belur Math, this is Volume 9 of the nine volume series constituting 'The Complete Works of Swami Vivekananda'. In these volumes we have not only a gospel to the world at large, but also, to its own children, the Charter of the Hindu faith. For the first time in history, Hinduism itself forms here the subject of generalization of a Hindu mind of the highest order. What Hinduism had needed was the organizing and consolidating of its own idea, a rock where she could lie at anchor, and an authoritative utterance in which she might recognise herself. What the world had needed was a faith that had no fear of truth. Both are found in the words and writings of Swami Vivekananda. It is the latest gospel of a modern Prophet of religion and spirituality to the mankind.

Evolution in general means a process of change or transformation. Evolution commonly used to refer to biological, genetic or organic evolution. Evolution is change in the heritable characteristics of biological populations over successive generation. History of evolutionary theory refers to Overview, Renaissance, Before Darwin, Darwin, Origin of Species, Before synthesis, Modern synthesis, Molecular evolution, Evo-devo, Current research, History of speciation, History of paleontology, etc. Modern synthesis theory of evolution shed light on population genetics, genetic variation, natural selection, eclipse of Darwinism and non-Darwinian theories of evolution. Malthusian completion and variation lead to Natural selection. Mutation lead to Genetic variation and Mendelian inheritance. All these together ended in Modern synthesis. Vedic evolution refers to the philosophy and science of evolution according to Vedas. Hinduism sheds light of the Origin of life, creation and evolution based on Vedas, Brahmanas and Puranas. The Rigveda mentions the Hiranyagarbha ("golden embryo") as the source of the Personal and Impersonal Universe, similar to the "world egg" motif found in the creation myths of many other civilizations. Hindus find support for evolution in scriptures. Dashavatara has similarities to Charles Darwin's theory of evolution. The Shatapatha Brahmana states that the current human generation descends from Manu, the only man who survived is comparable to the other flood legends, such as the story of the Noah's Ark mentioned in the Bible and the Quran. Hindu Dharma believes in the evolution and involution of forms of lives according to Karma of individuals. In every form of species exists the soul that stands as eternal witness of thoughts of mind that becomes actions. Author of this book, exhibits his findings of serious research about "Evolution according to Vedas, in relation to that of contemporary modern synthesis theory of evolution, that the origin of man is time immemorial. The end of man is the climax of human evolution i.e., Suddha Prajñe, i.e., Pure Consciousness, which is the embodiment of "Sat Chit Ananda i.e., Eternal Truth – Eternal Knowledge – Eternal Bliss." The book "Vedic Evolution : Its Philosophy and Science" may become a source book for finding solutions to Global Harmony, Happiness and Peace. Human life lead naturally leads to Pure Consciousness. Vedic Evolution is the evolution of human life from: "Falsity to Truth; from Ignorance to Wisdom; from Death to Immortality." Vedic message to humanity is: "O Man, you have to live hundred years, evolving healthily-happily and spiritually, until you become one with THAT SUPREME PURE CONSCIOUSNESS WHICH IS ALL PERVASIVE, BOTH IN THE SEEN AND UNSEEN COSMIC EGG OR BRAHMANADA."

Home Life in Bengal

In this compelling social history, William R. Pinch tackles one of the most important but most neglected fields of the colonial history of India: the relation between monasticism and caste. The highly original inquiry yields rich insights into the central structure and dynamics of Hindu society—insights that are not only of scholarly but also of great political significance. Perhaps no two images are more associated with rural India than the peasant who labors in an oppressive, inflexible social structure and the ascetic monk who denounces worldly concerns. Pinch argues that, contrary to these stereotypes, North India's monks and peasants have not been passive observers of history; they have often been engaged with questions of identity, status, and hierarchy—particularly during the British period. Pinch's work is especially concerned with the ways each group manipulated the rhetoric of religious devotion and caste to further its own agenda for social reform. Although their aims may have been quite different—Ramanandi monastics worked for social equity, while peasants agitated for higher social status—the strategies employed by these two communities shaped the popular political culture of Gangetic north India during and after the struggle for independence from the British.
